# KEYBOARD FEATURES OVERVIEW

### RESTORE FACTORY SETTINGS

Press and hold for five seconds to restore factory settings (including all lighting effects and macros).

✘ After the settings are restored, a startup animation will run once to indicate that all settings have been restored.

### EMAIL

Open the default email box.

### WEB BROWSER

Open the default web browser/return to the home page.

<b>MY COMPUTER</b>		
 + 	Open my computer.	

<b>CALCULATOR</b>		
 + 	Open the system's built-in calculator.	

<b>MULTIMEDIA PLAYER</b>		
 + 	Open the system's built-in multimedia player.	

### SWITCHING LIGHTING EFFECTS

#### Static:

(1). Fn + F9 (red), F10 (green), and F11 (blue) to change the color of the lighting effect.

#### Pulse:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + F12 to switch between monochrome and random color modes.

(3). Under monochrome mode, Fn + F9 (red), F10 (green), and F11 (blue) can be used to adjust the color of the lighting effect.

#### Wave:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + ↑, ↓, ←, or → to change the direction of running lights.

(3). Fn + F9 (red), F10 (green), and F11 (blue) to change the color of the lighting effect.

#### Spiral Rainbow:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + ← (counterclockwise) or → (clockwise) to switch the direction of running lights.

(3). Fn + F9 (red), F10 (green), and F11 (blue) to change the color of the lighting effect.

#### RGB Spectrum:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

#### Reactive:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + F12 to switch between monochrome and random color modes.

(3). Under monochrome mode, Fn + F9 (red), F10 (green), and F11 (blue) can be used to adjust the color of the lighting effect.

#### Flow:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + F12 to switch between monochrome and random color modes.

(3). Under monochrome mode, Fn + F9 (red), F10 (green), and F11 (blue) can be used to adjust the color of the lighting effect.

#### Ripple:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + F12 to switch between monochrome and random color modes.

(3). Under monochrome mode, Fn + F9 (red), F10 (green), and F11 (blue) can be used to adjust the color of the lighting effect.

#### Raindrop:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + F12 to switch between monochrome and random color modes.

(3). Under monochrome mode, Fn + F9 (red), F10 (green), and F11 (blue) can be used to adjust the color of the lighting effect.

#### Bricks:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

(2). Fn + ↑ or ↓ to change the direction of running lights.

(3). Fn + F12 to switch between monochrome and random color modes.

(4). Under monochrome mode, Fn + F9 (red), F10 (green), and F11 (blue) can be used to adjust the color of the lighting effect.

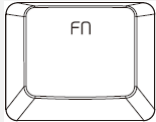

#### Concentric Circles:

(1). Fn + F7 (slower) and F8 (faster) to adjust the speed of the lighting effect.

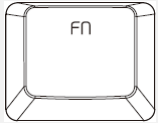

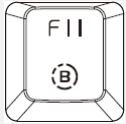

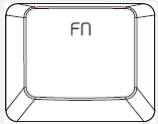

(2). Fn + F12 to switch between monochrome and color modes.

(3). Under monochrome mode, Fn + F9 (red), F10 (green), and F11 (blue) can be used to adjust the color of the lighting effect.

<b>DECREASING THE SPEED OF LIGHTING EFFECTS</b>	<p>Five different lighting effect speeds (the    will flash when the speed is set to the slowest setting).</p>
 + 	
<b>INCREASING THE SPEED OF LIGHTING EFFECTS</b>	<p>Five different lighting effect speeds (the    will flash when the speed is set to the fastest setting).</p>
 + 	
<b>ADJUST THE BRIGHTNESS OF THE RED LIGHT</b>	<p>Ten brightness level settings for the red light (the    will flash when the brightness is set to the brightest setting).</p> <p>※Press and hold for three seconds to clear the red value (once cleared, the    will flash at the same time).</p>
 + 	

<b>ADJUST THE BRIGHTNESS OF THE GREEN LIGHT</b>	<p>Ten brightness level settings for the green light (the  will flash when the brightness is set to the brightest setting).</p> <p>✖ Press and hold for three seconds to clear the green value (once cleared, the  will flash at the same time).</p>
 + 	
<b>ADJUST THE BRIGHTNESS OF THE BLUE LIGHT</b>	<p>Ten brightness level settings for the blue light (the  will flash when the brightness is set to the brightest setting).</p> <p>✖ Press and hold for three seconds to clear the blue value (once cleared, the  will flash at the same time).</p>
 + 	
<b>SWITCHING COLOR MODES</b>	<p>Can be used to switch between monochrome and random color modes for a specific lighting effect.</p> <p>✖ Under monochrome mode, this key serves as the mixed-color indicator.</p>
 + 	

### CHANGING THE DIRECTION OF LIGHTING EFFECTS

You can switch the running direction of a specific lighting effect.

### SWITCHING PROFILES

Up to six profiles can be saved. The current active profile is shown by the color displayed on the .

**P1:** Red, **P2:** Green, **P3:** Blue, **P4:** Yellow, **P5:** Purple, **P6:** Aquamarine.

✗ The color statuses described above are only visible under Game Mode.

### ON-THE-FLY MACRO RECORDING

#### Macro Recording (only available under Game Mode):

- (1). Press Fn + PrtSc to enter recording mode (the entire keyboard will light up and the Record button will begin to flash).
- (2). Press Fn + Any Key (excluding the recording key) to specify a key to save the macro under (a red light will appear after a slight delay; if you press Fn + the same key, a blue light will appear without a delay). Once the key selection is completed, all lights on the keyboard will go out, and the recording key will change from flashing to constantly lit.
- (3). Enter the sequence to be recorded (keys recorded will flash in white).
- (4). After the sequence is entered, press Fn + PrtSc to exit recording mode (the light for the Recording key will go off).

#### Macro Prompt Function:

While in recording mode, if the key's backlight is solid white, that means there is currently no macro assigned to this key. If the key is solid green, that means a macro has been assigned to this key.

Shown in the following figure: the "A" key has a macro assigned to it.

✘ Press and hold a key which has been assigned a macro for more than 3 seconds to erase the saved macro.

### AREA BACKLIGHT

Supports up to five presets: FPS1 、FPS2 、MMO 、MOBA 、RTS ◦

### RECORDING AREA BACKLIGHT

**Recording procedure (recording can only be activated while in area backlight mode):**

(1). Press Fn + ScLk to enter area backlight mode.

(2). Press Fn + Pause to enter backlight recording mode (the recording button will flash).

(3). Press Fn + F9 (**Red**), F10 (**Green**), and F11 (**Blue**) to produce a desired color by mixing the three colors together (F12 will display the blended color).

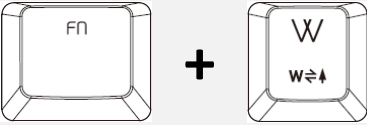

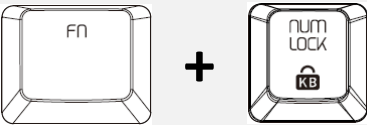

(4). Press the key in each display area in order.

(5). Once completed, press Fn + Pause to exit recording mode (the recording button will stop flashing).

**※ Press and hold for five seconds to restore the area's preset light position and color value**

(    indicator lights will flash at the same time to indicate that the settings have been restored).

<b>SWITCHING WASD AND THE DIRECTION KEYS</b>	<p>Switches the functions of WASD keys with the arrow keys.</p>
	
<b>FULL KEYBOARD LOCK</b>	<p>Lock the entire keyboard (  indicator lights will flash at the same time to indicate the current status).</p>
	
<b>GAME MODE</b>	<p>When this key is lit up in white, this means it is in non-game mode. Once game mode is activated, the indicator color will light up in the color specified in the setup profile.</p> <p>✘ While not operating under game mode, all keys will function according to their preset values.</p>
	

### FULL BRIGHTNESS ADJUSTMENT

A total of five brightness levels are available for adjusting the brightness of the keyboard's lighting effects.

### LOCKING THE WINDOWS KEY

The windows key can be replaced with the function of the ctrl key.

✂ Before the key is locked, a white-colored light will turn on. After the key is locked, an aquamarine-colored light will turn on.

### MULTI-FUNCTION WHEEL

+

Fn + Wheel Side Button (Mute) : Switches multi-function (

indicator lights will flash at the same time to indicate the current status).

#### Multi-Function:

Scroll Up / Down : Mouse wheel up / down

Press mute button : Previous page

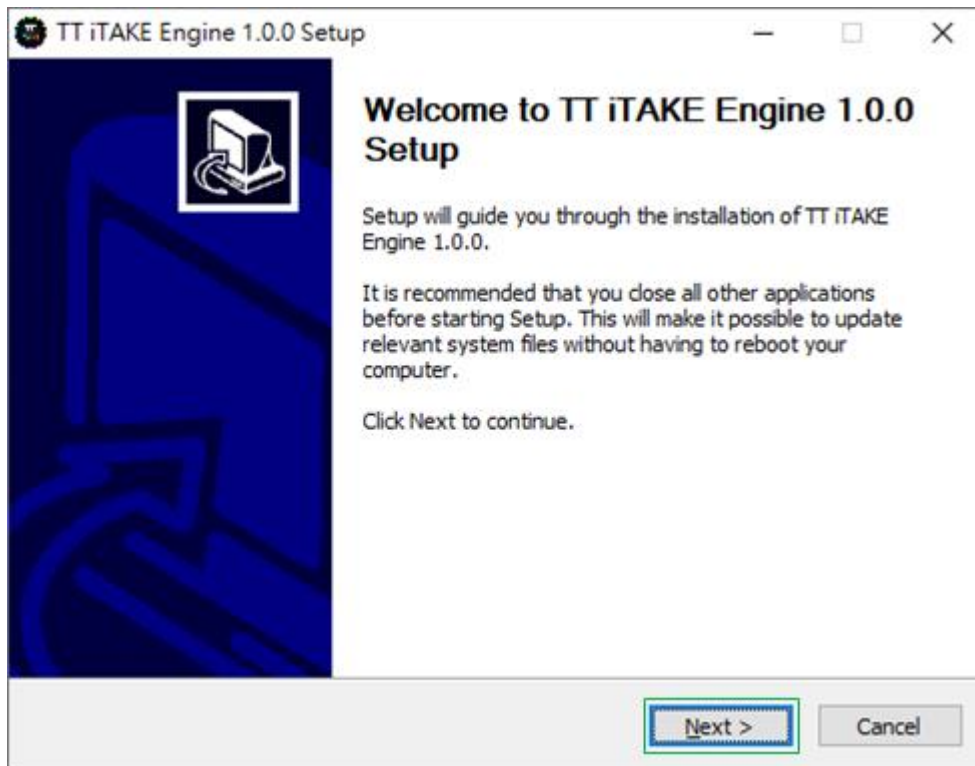

Press mute button twice : Next page

## | Chapter 2: TT iTAKE INSTALLATION

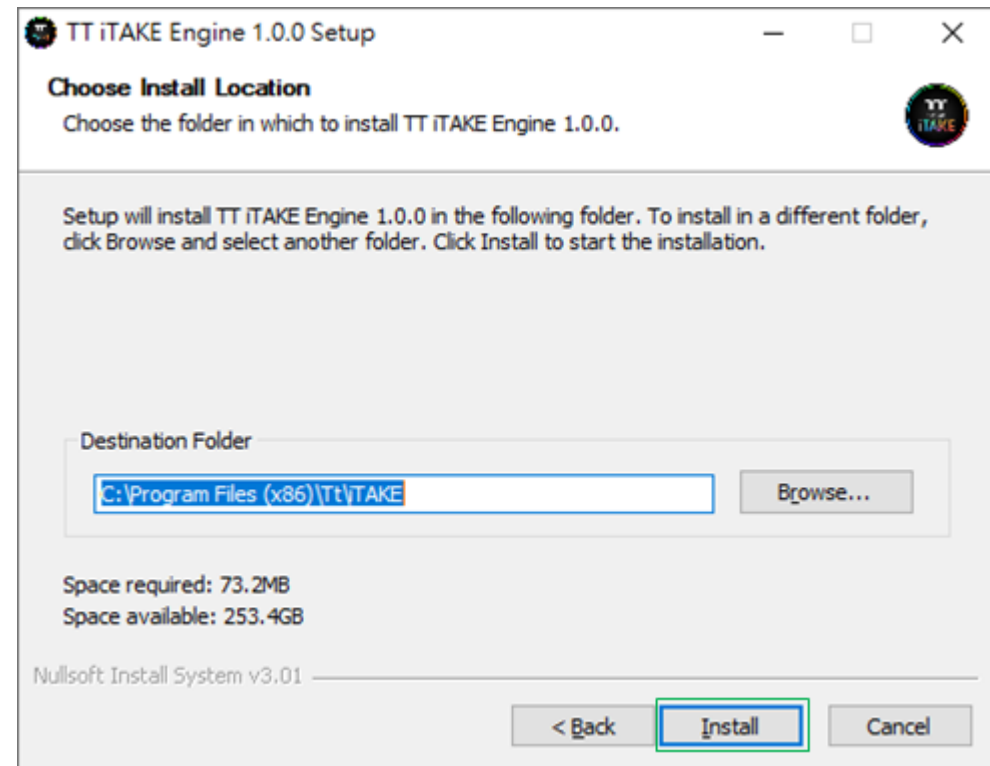

## Step 1:

Launch the setup executable file (.EXE) file and click Next.

## Step 2:

Click Install to begin the setup process.

## Step 3:

Click Finish to complete the installation.

# | Chapter 3: FUNCTIONS AVAILABLE ON THE HOME PAGE

### Home Page

You can switch the keyboard model.

### Profiles

The Argent K6 RGB can support up to 6 profiles, which can be switched as required.

### Switching Configuration Pages

Switches between the configuration pages customize key operation, macro recording, lighting effects and sync setting.

### Functions for Managing Profiles

Up to 15 profiles can be added for use. The functions of each button from left to right are:

**Add:** Create a new profile.

**Delete:** Delete an existing profile.

**Copy:** Copy a profile.

**Import:** Import a profile.

**Export:** Export a profile.

### Correcting the Name of a Profile

The name of a new profile can be modified directly.

### Assigning Key Functions

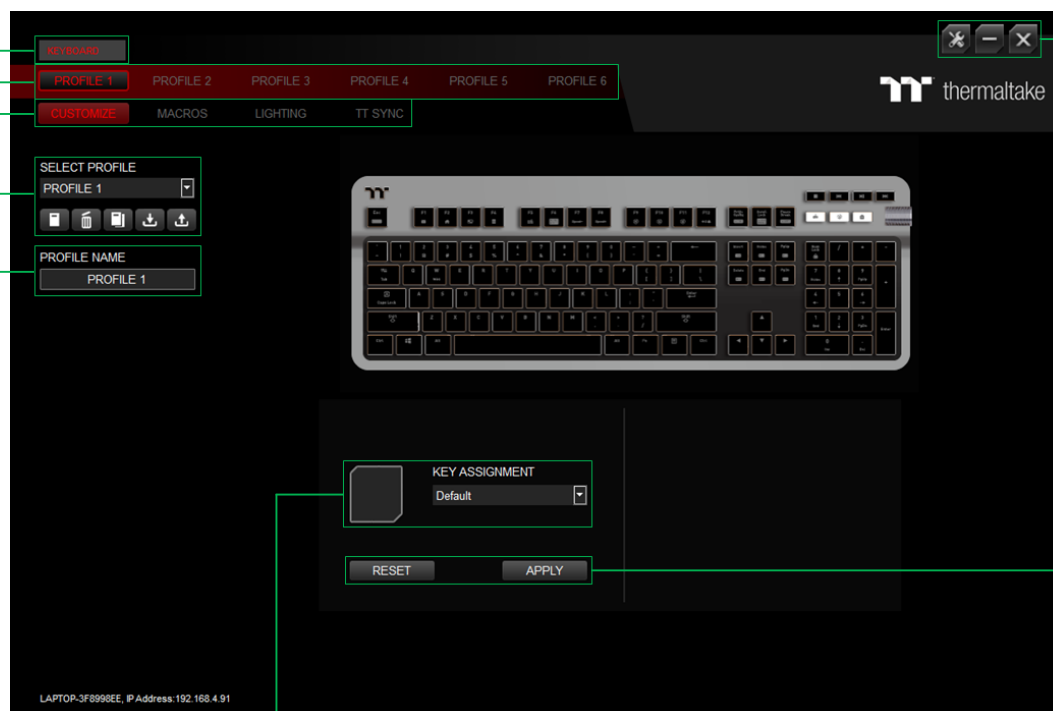

Nine different functions can be assigned.

### Other Settings / Shrink Window / Close Window

**Other Settings:** Software version, Amazon Alexa setting and switching the language used for the user interface.

**Shrink Window:** Close the display and minimize the program to the taskbar.

**Close Window:** Close the display and minimize the program to the lower right corner.

### Restore Keyboard Settings for All Keys / Apply

**Restore Keyboard Settings for All Keys:** All key functions saved under the current profile will be restored to factory default values.

**Apply:** Save and apply all settings to the selected key.

# | Chapter 4: KEY CONFIGURATIONS

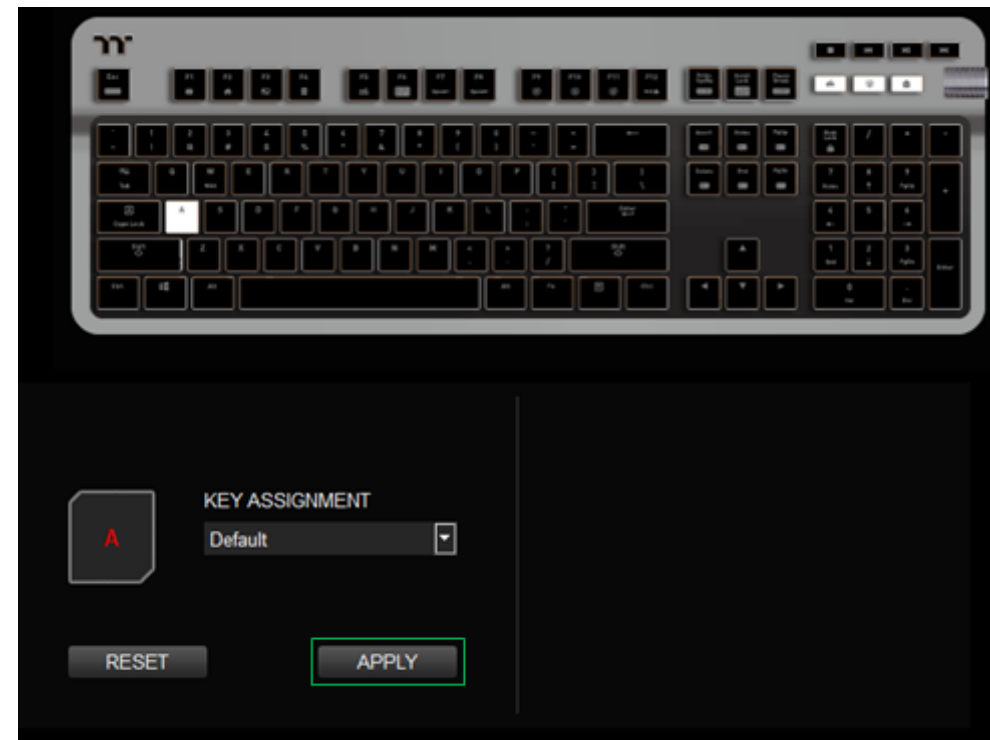

## Step 1:

Select a key, then select "Default" function from the drop-down list.

## Step 2:

Click Apply to change and save the new function.

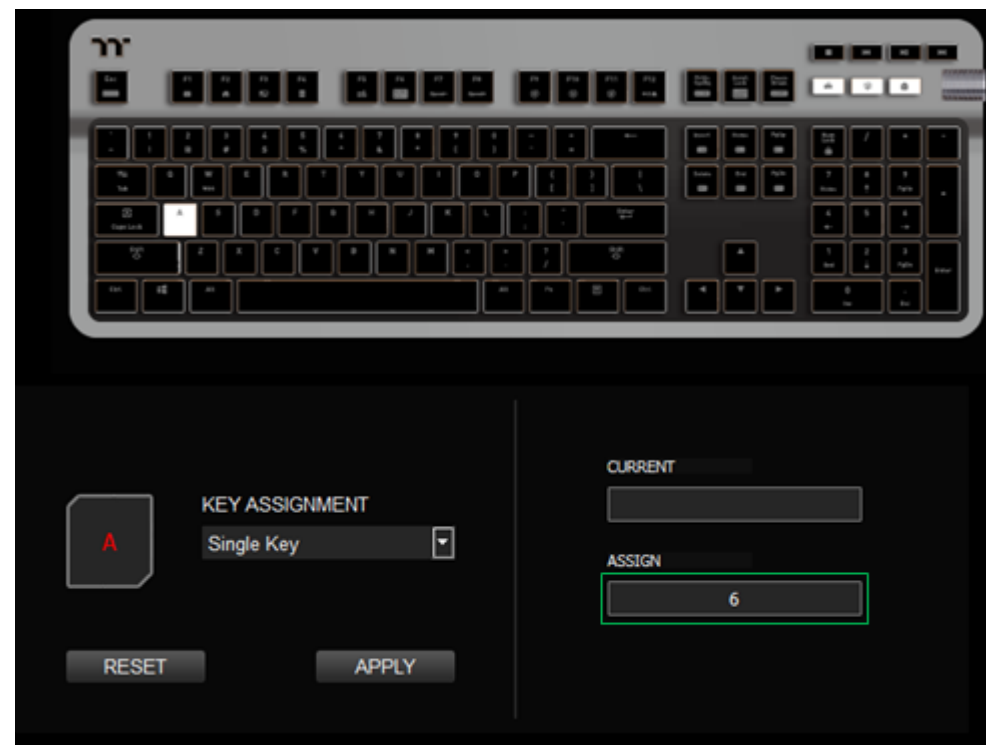

## Step 1:

Select a key, then select "Single Key" function from the drop-down list.

## Step 2:

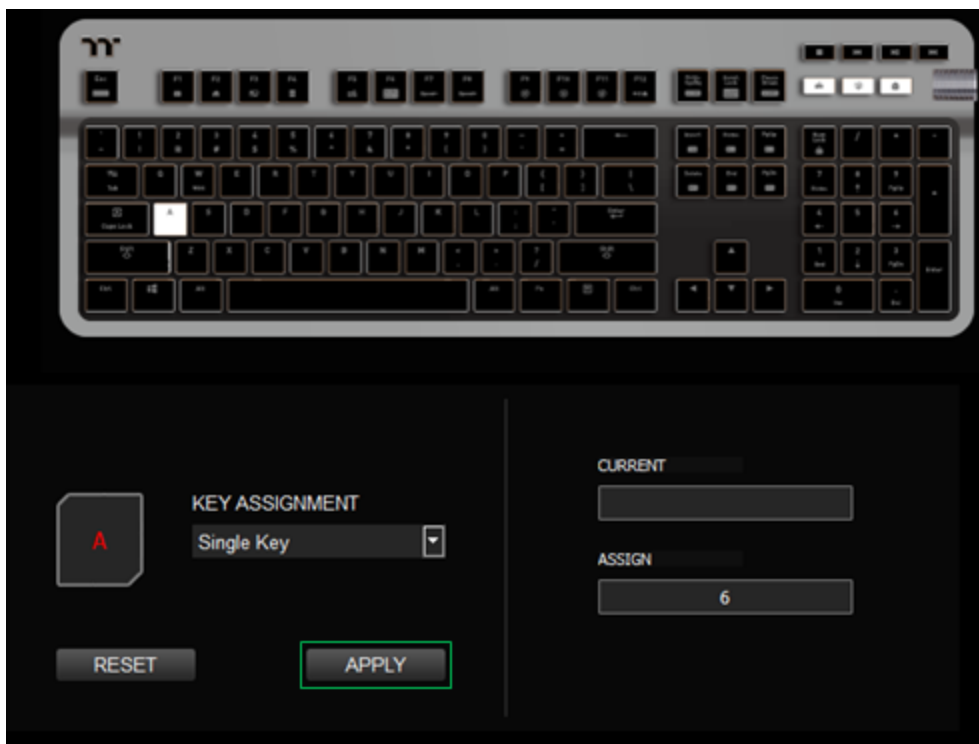

Enter a new key value into the lower-right box.

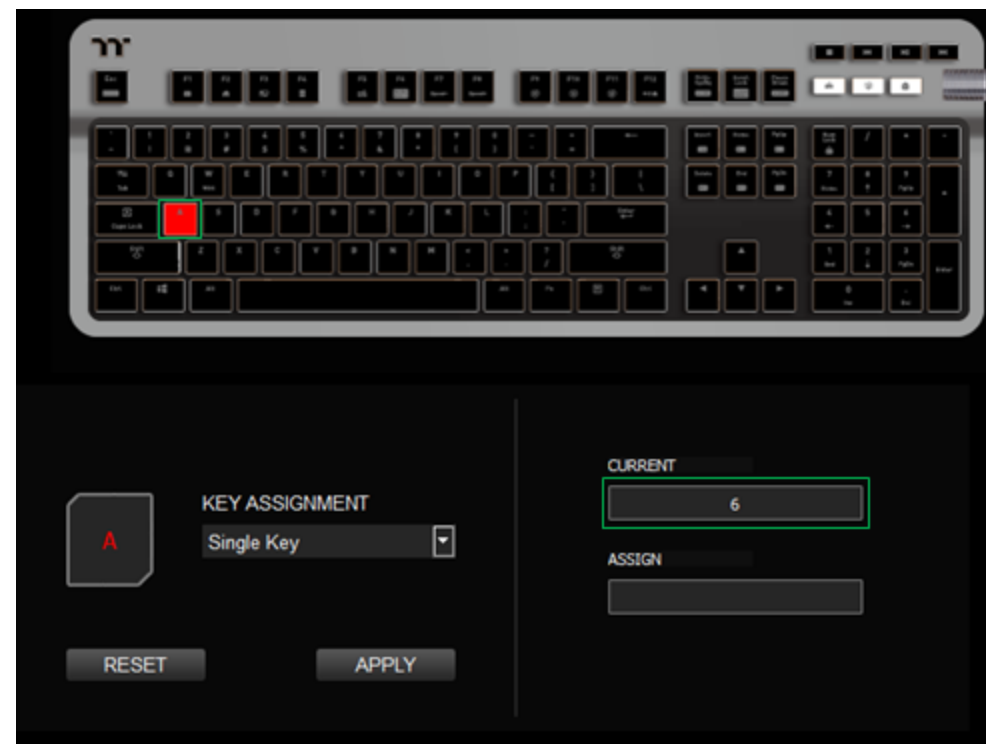

## Step 3:

Click Apply to change and save the new function.

## Step 4:

Based on the information and color displayed on the screen, you will be able to see if the new key setting is applied properly.

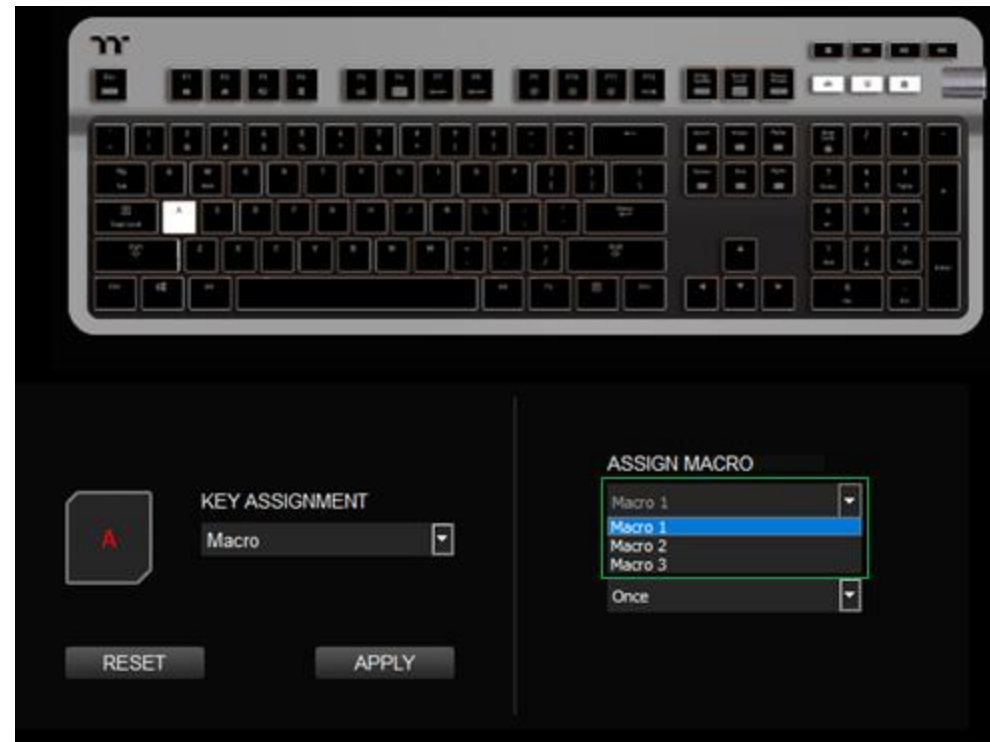

## Step 1:

Select a key, then select "Macro" function from the drop-down list.

## Step 2:

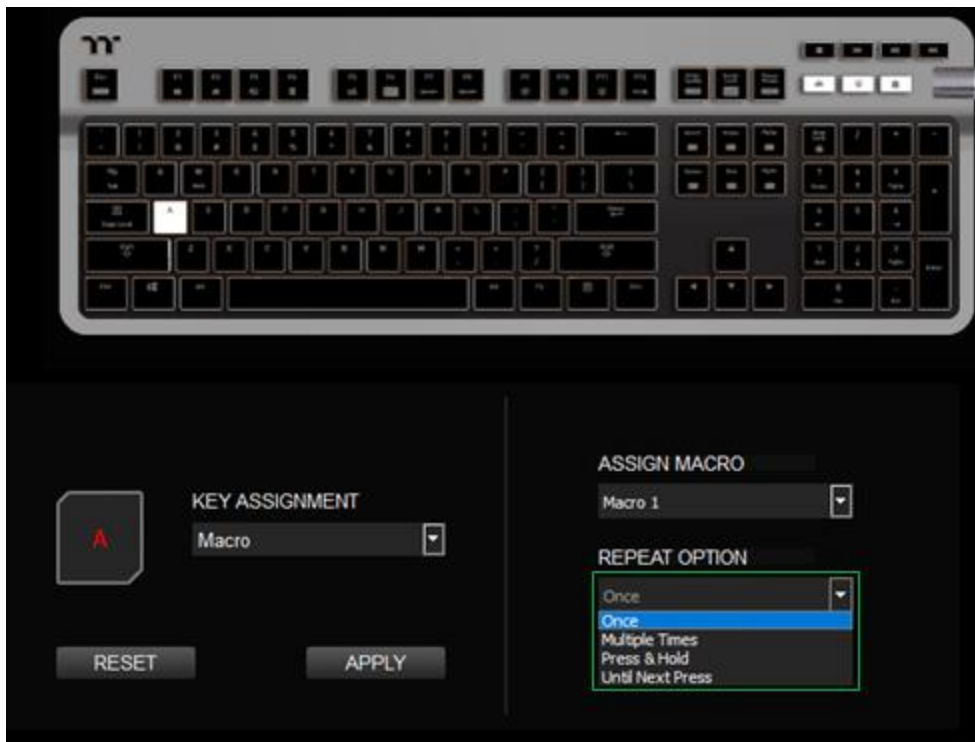

Select a macro from the upper-right.

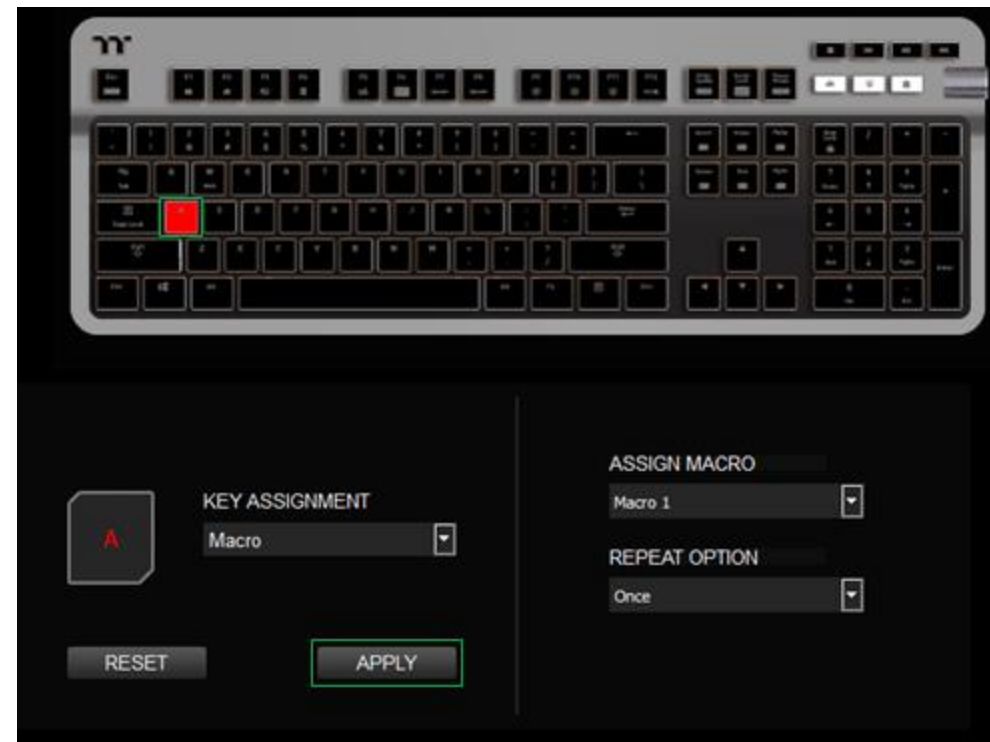

## Step 3:

Select a macro repeat option from the drop-down list located in the lower-right corner.

## Step 4:

Click Apply to save the new function. Verify if the new key function is applied properly by looking at the color displayed on the screen.

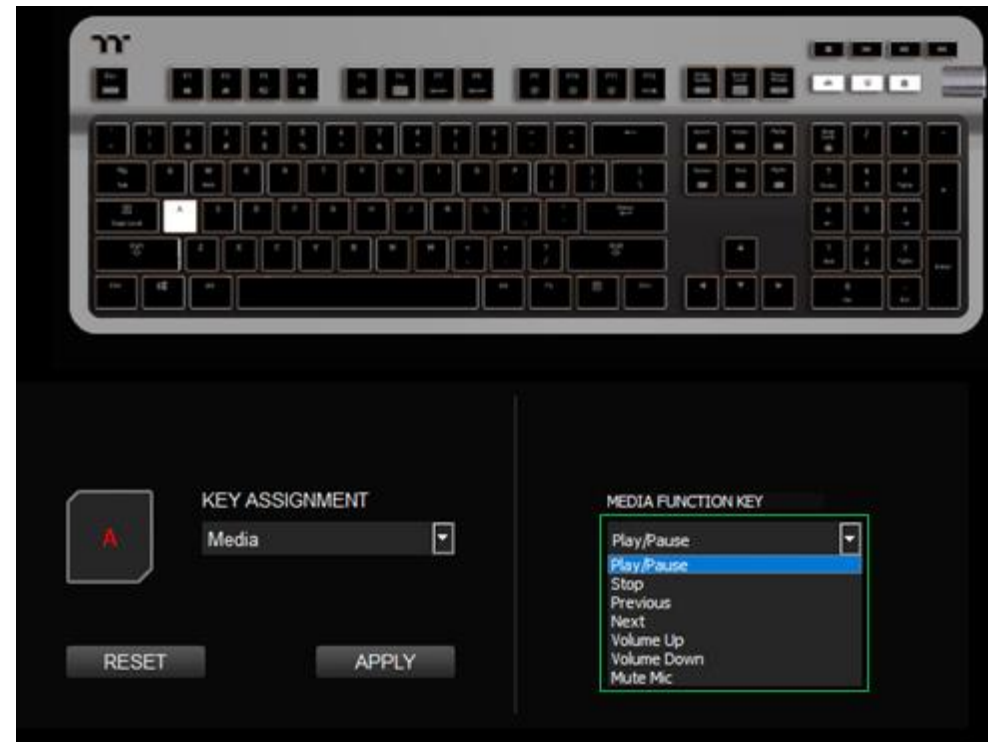

### Step 1:

Select a key, then select "Media" function from the drop-down list.

### Step 2:

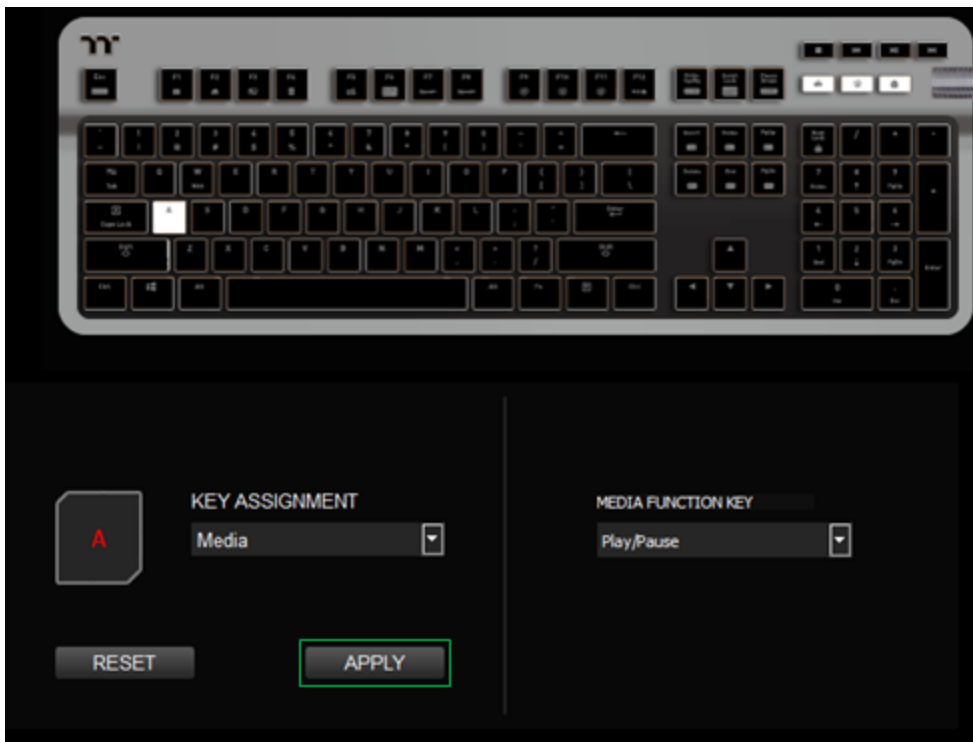

Select a media function in the right drop-down list.

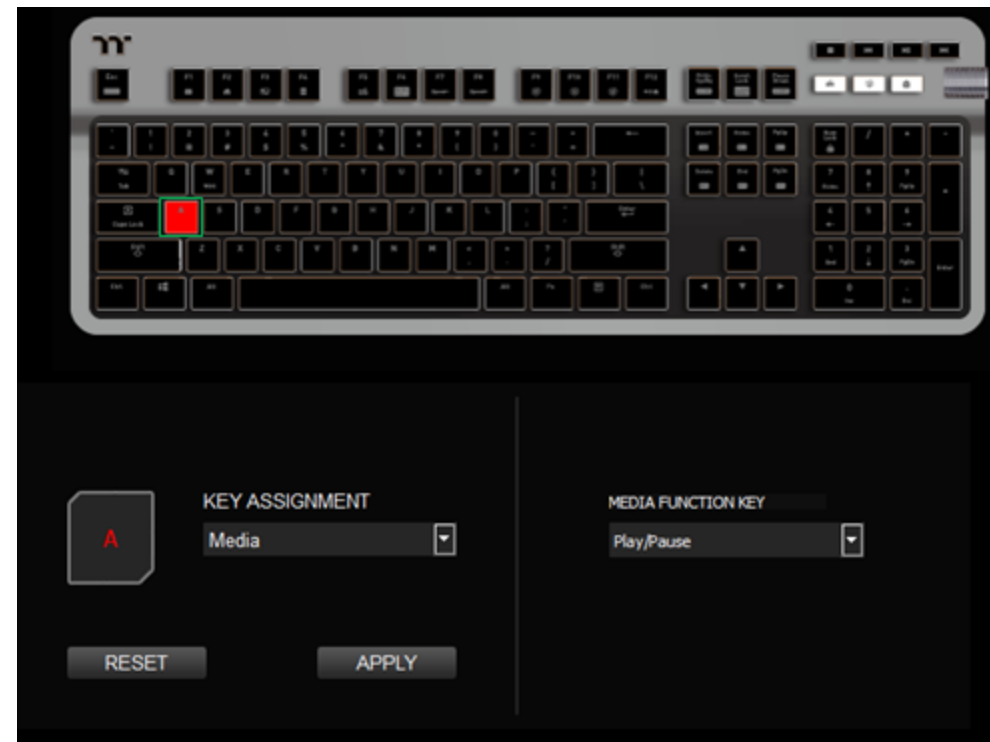

## Step 3:

Click Apply to change and save the new function.

## Step 4:

Verify if the new key function is applied properly by looking at the color displayed on the screen.

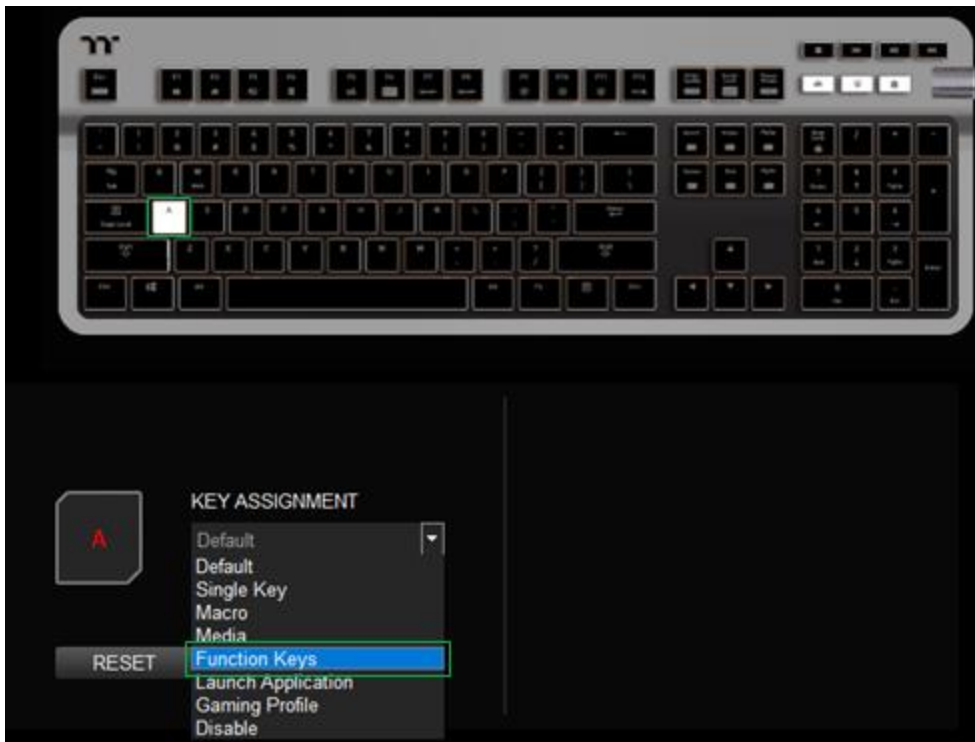

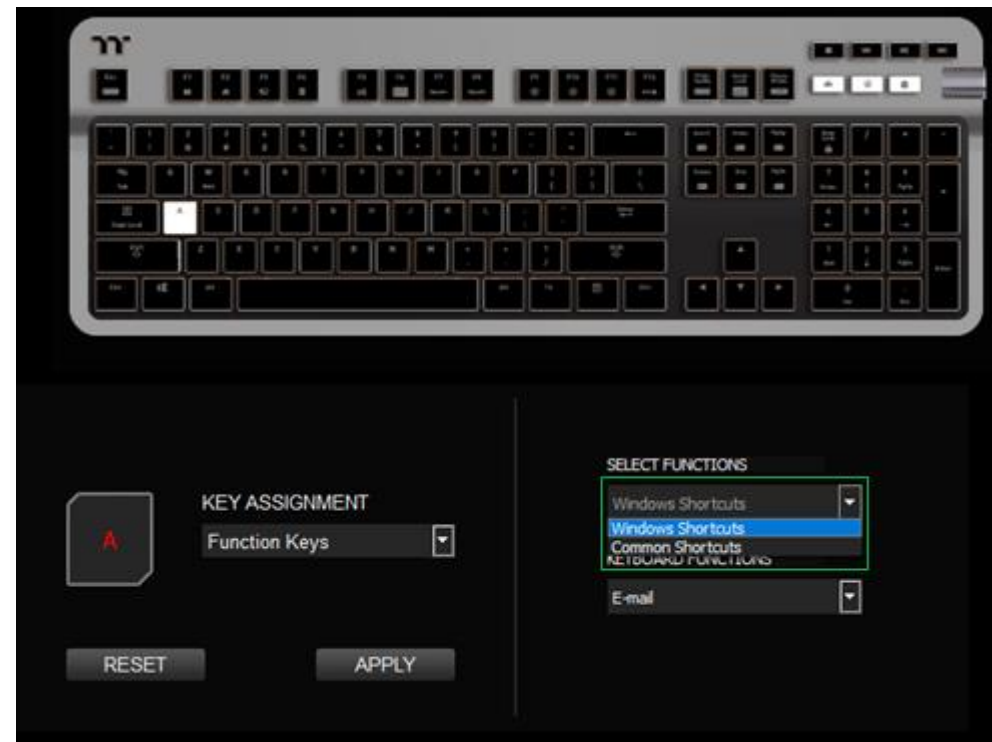

## Step 1:

Select a key, then select "Function Keys" function from the drop-down list.

## Step 2:

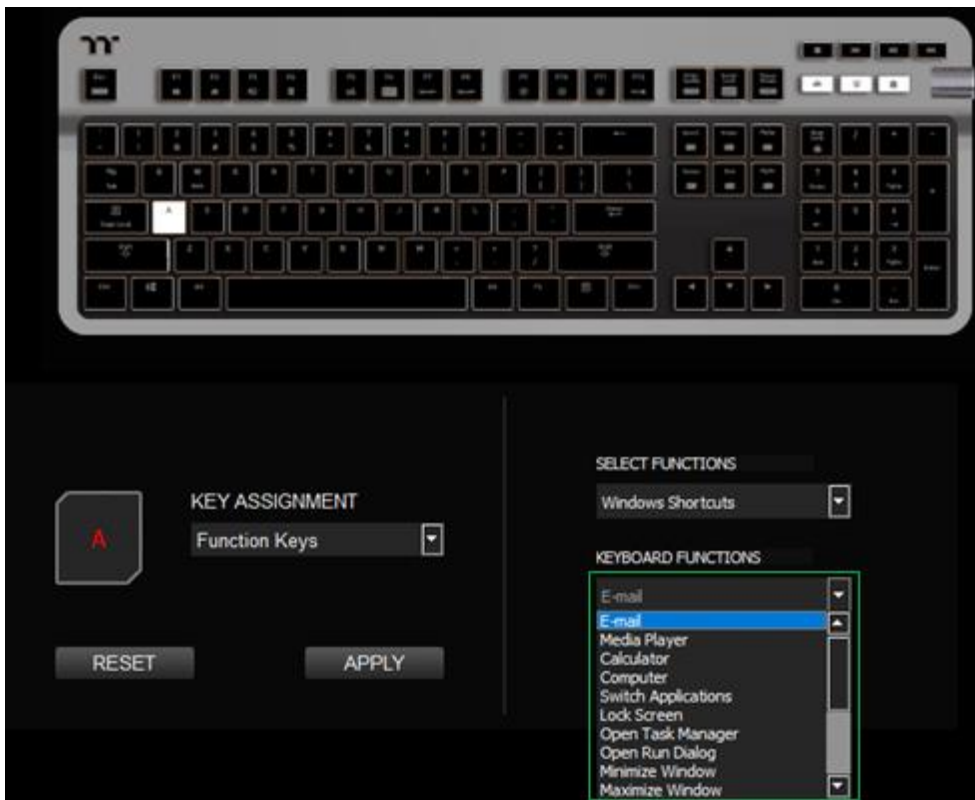

Select a type of hotkey function in the upper-right drop-down list.

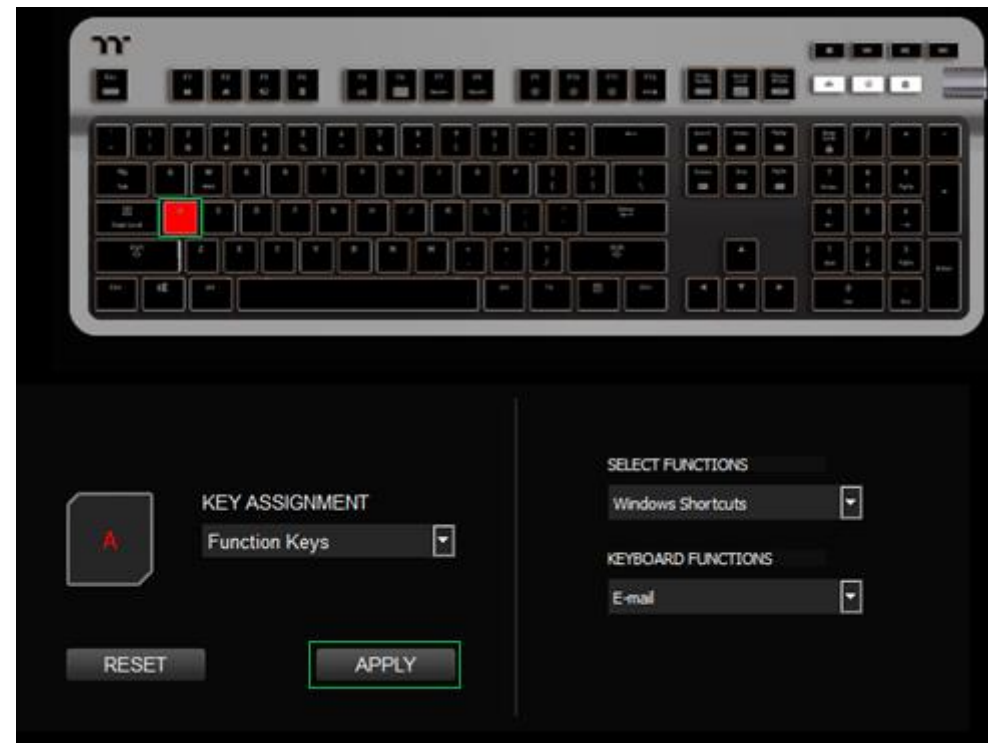

## Step 3:

Select a keyboard function in the lower-right drop-down list.

## Step 4:

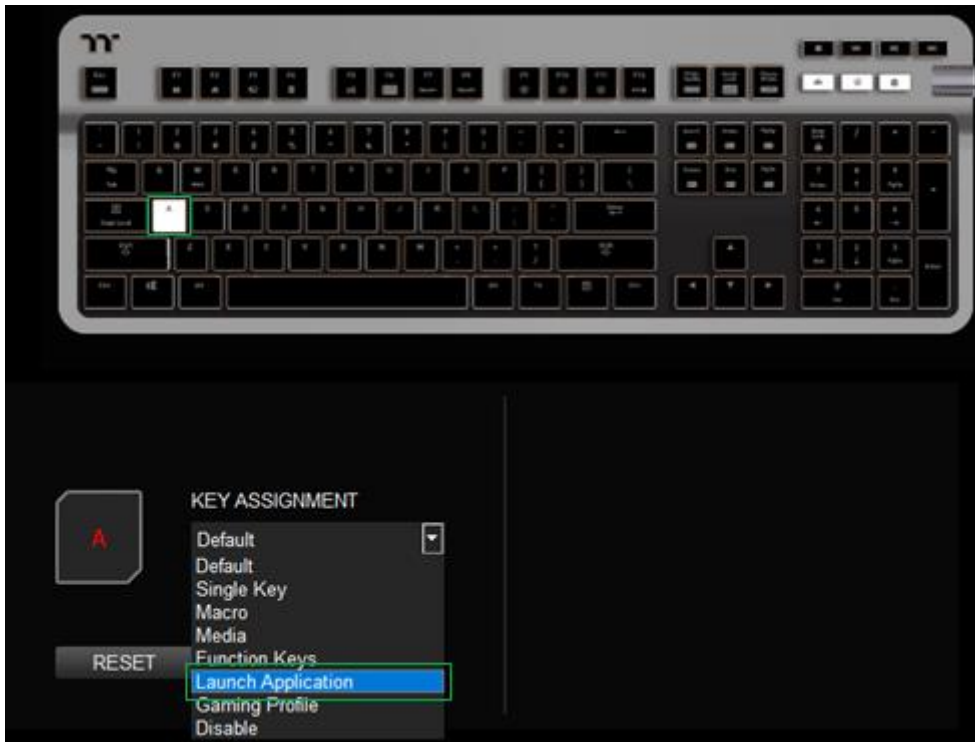

Click Apply to save the new function. Verify if the new key function is applied properly by looking at the color displayed on the screen.

### Step 1:

Select a key, then select "Launch Application" function from the drop-down list.

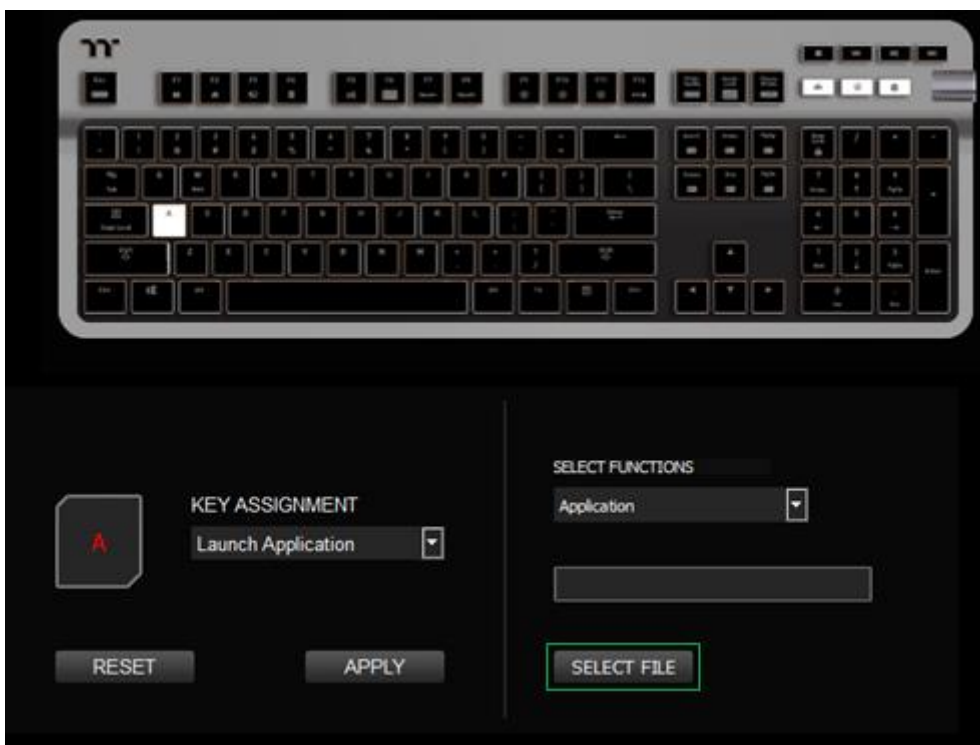

### Step 2:

Select "Application" in the upper-right drop-down list.

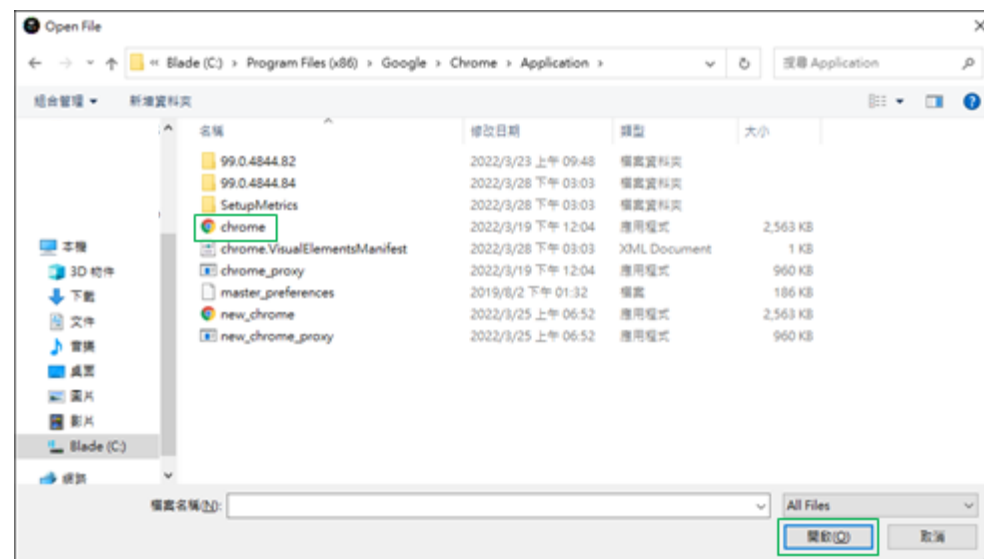

## Step 3:

Click on the Select File button located on the bottom-right.

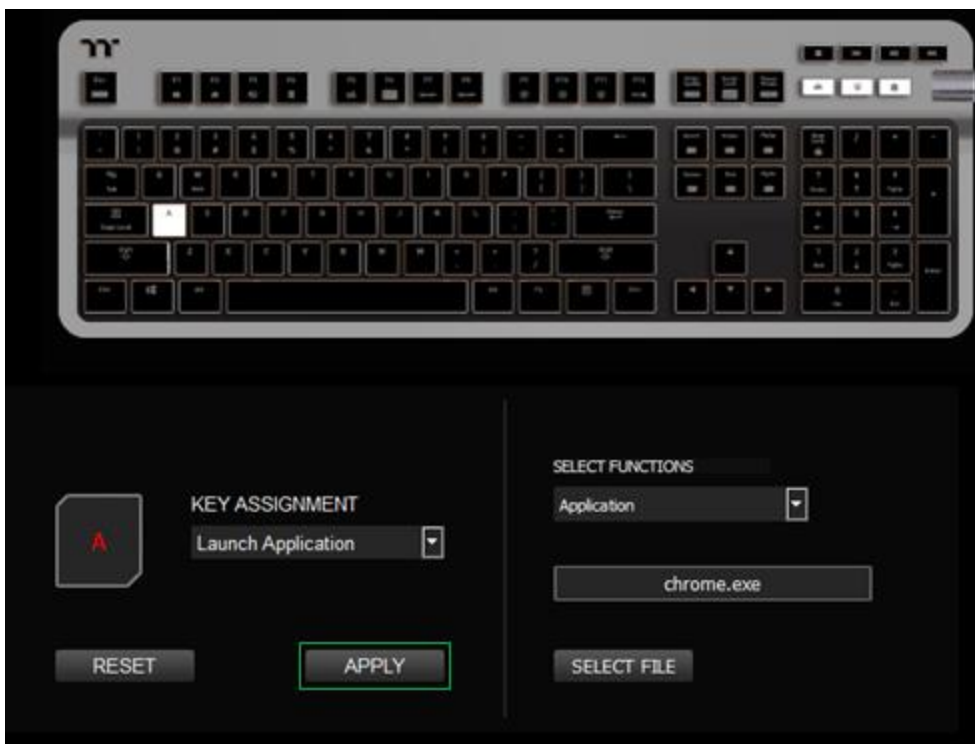

## Step 4:

Select the executable file (.EXE) to open.

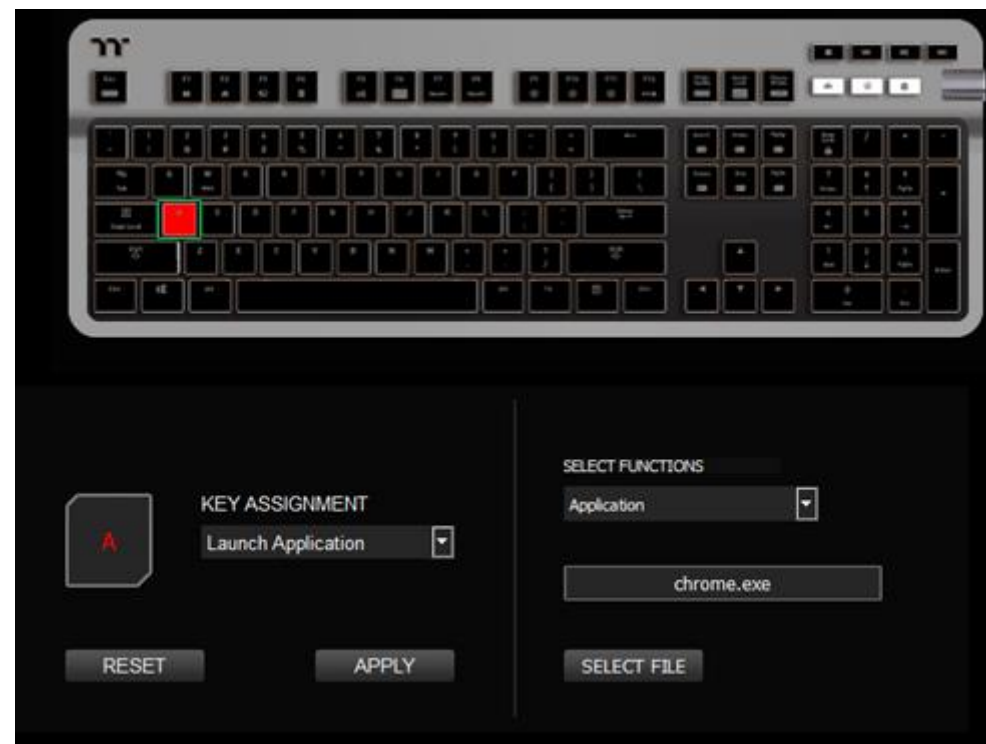

### Step 5:

Click Apply to change and save the new function.

### Step 6:

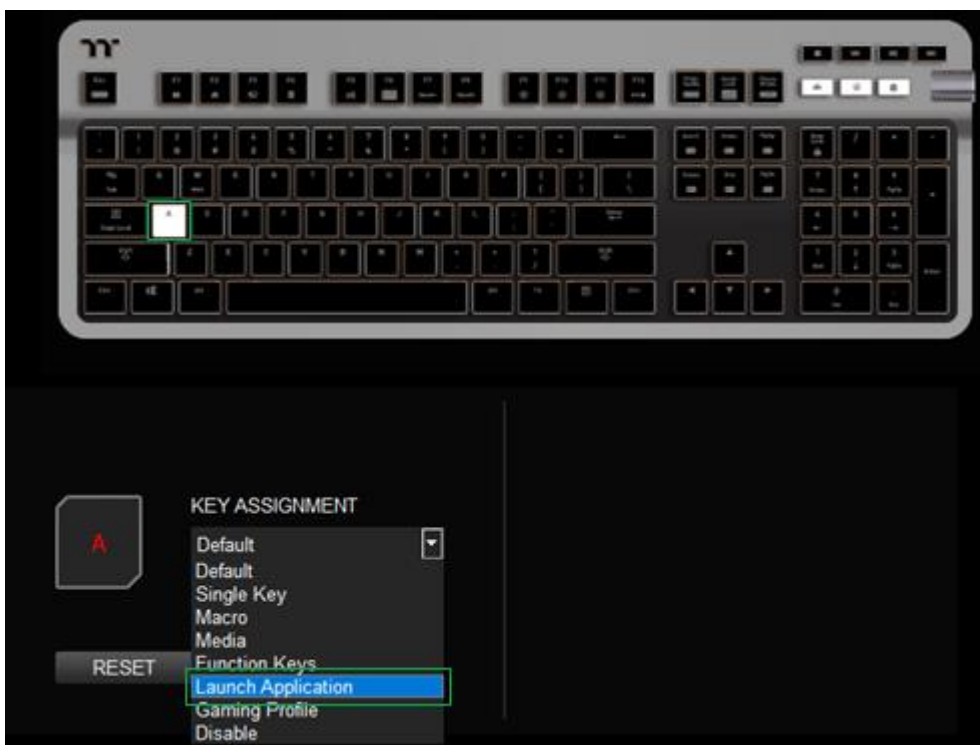

Verify if the new key function is applied properly by looking at the color displayed on the screen.

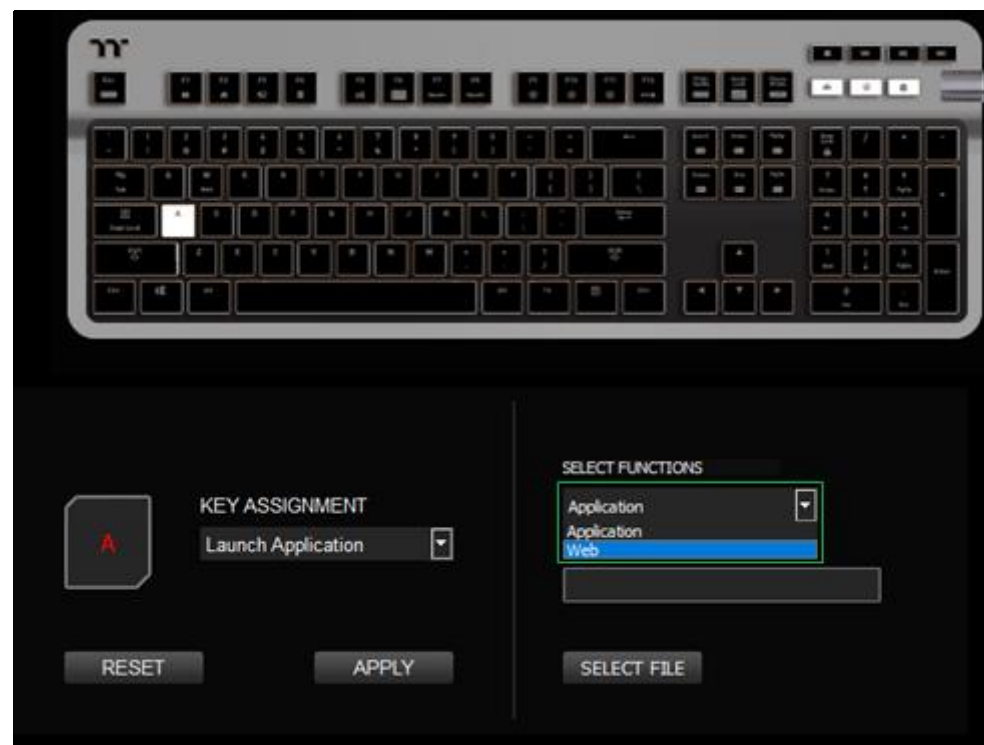

## Step 1:

Select a key, then select "Launch Application" function from the drop-down list.

## Step 2:

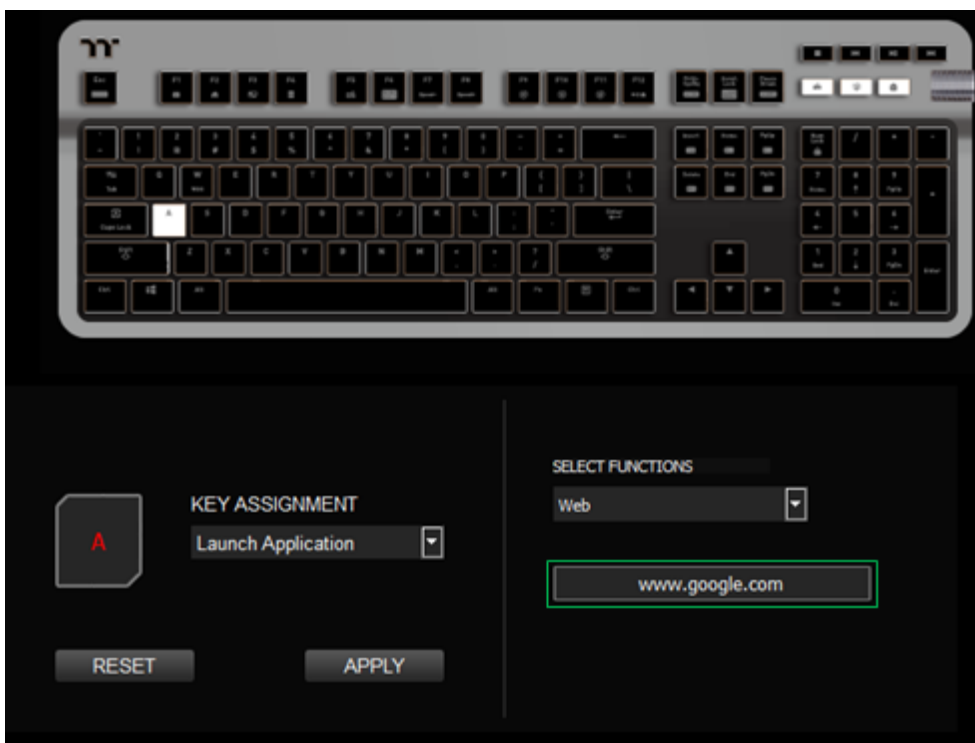

Select "Web" in the upper-right drop-down list.

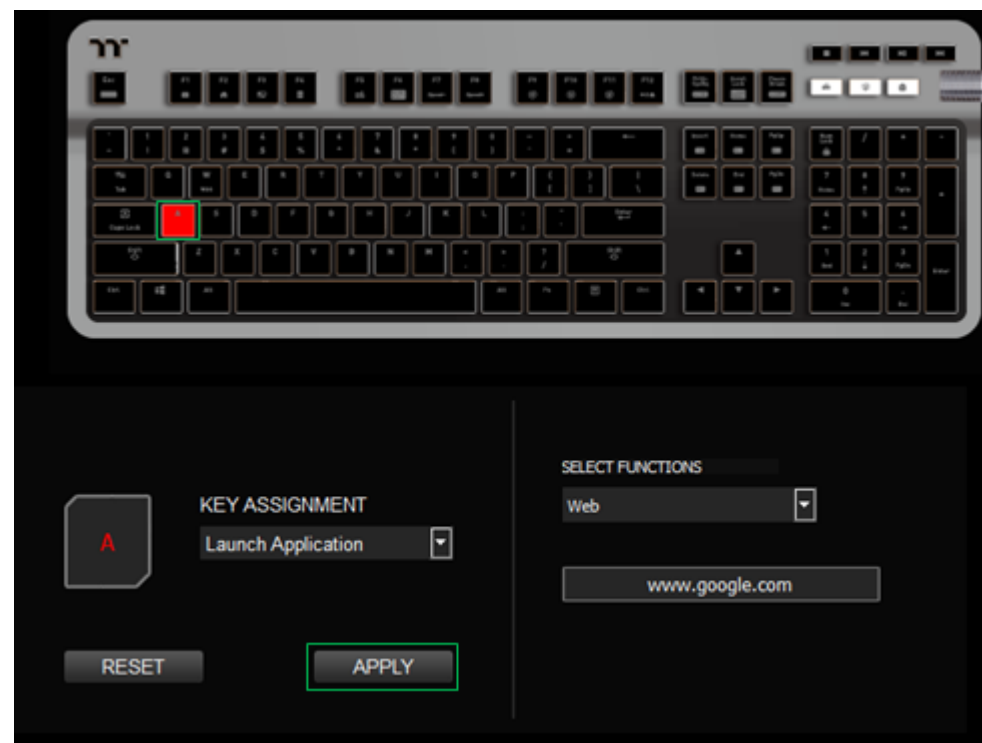

## Step 3:

Enter the URL into the textbox located on the bottom-right and press Enter.

## Step 4:

Click Apply to save the new function. Verify if the new key function is applied properly by looking at the color displayed on the screen.

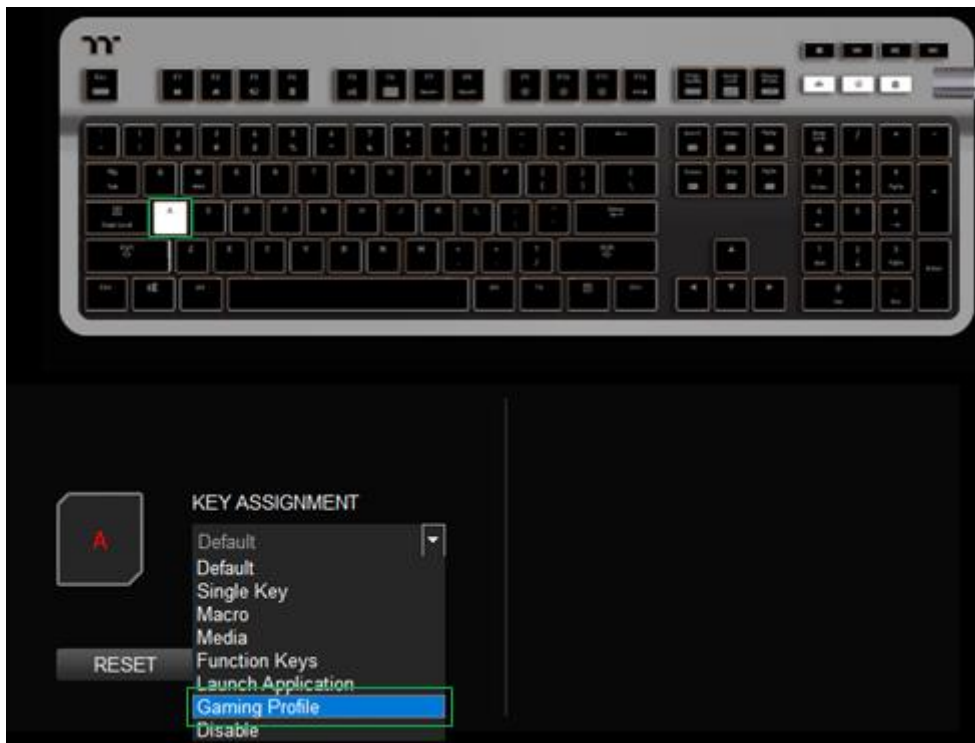

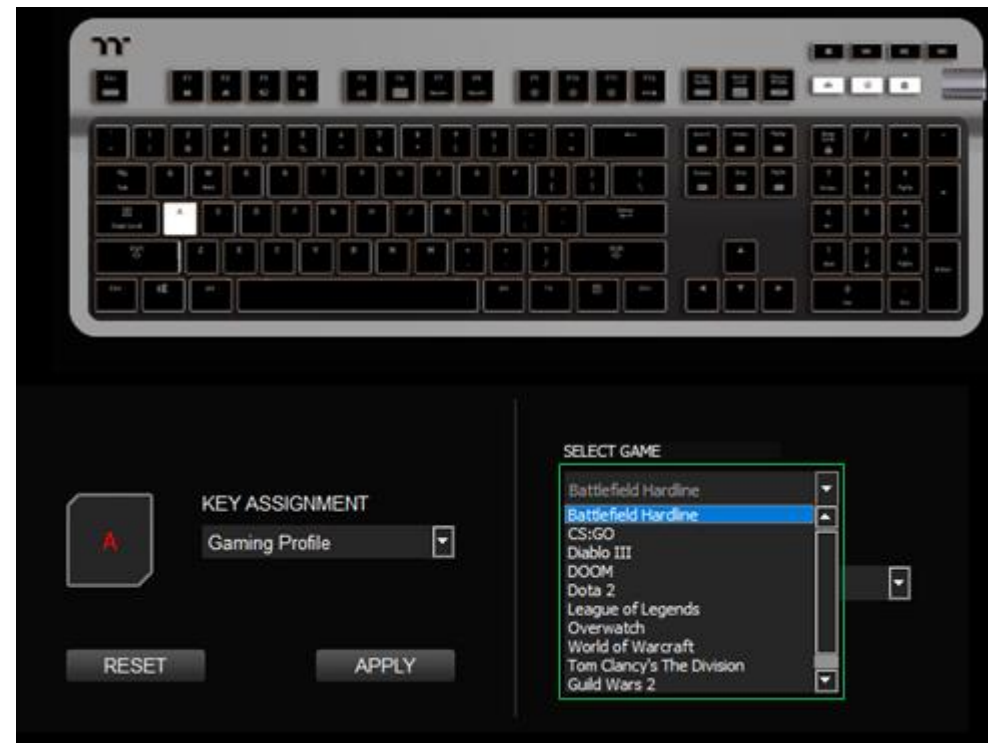

### Step 1:

Select a key, then select "Gaming Profile" function from the drop-down list.

### Step 2:

Select a game title in the upper-right drop-down list.

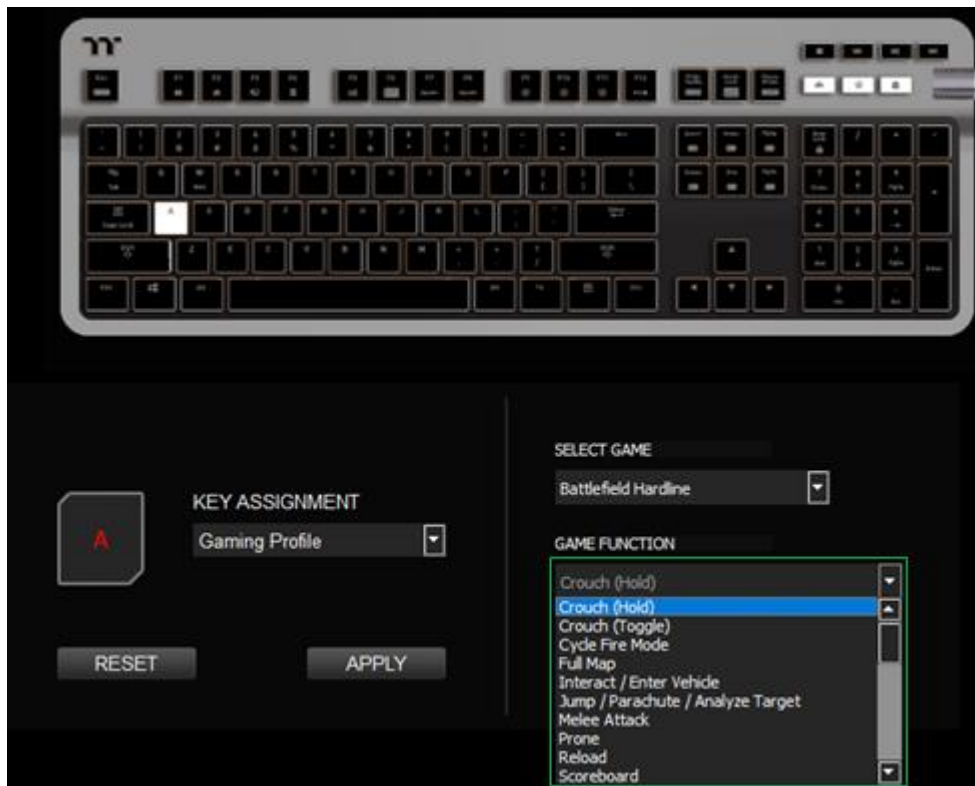

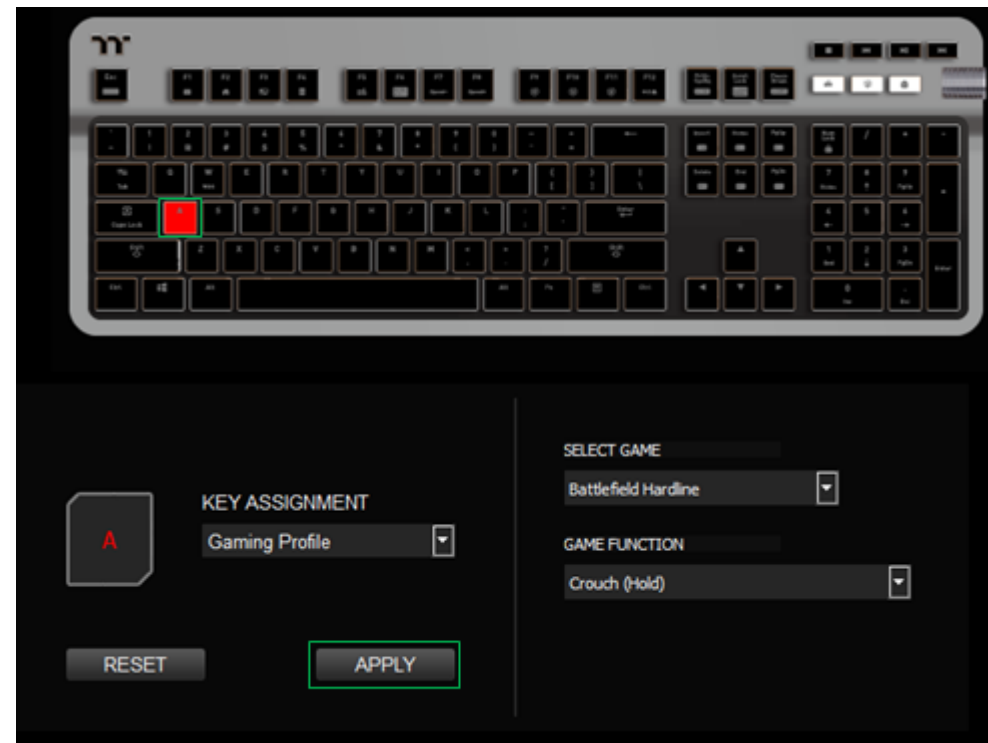

### Step 3:

In the lower-right drop-down list, select an in-game action.

### Step 4:

Click Apply to save the new function. Verify if the new key function is applied properly by looking at the color displayed on the screen.

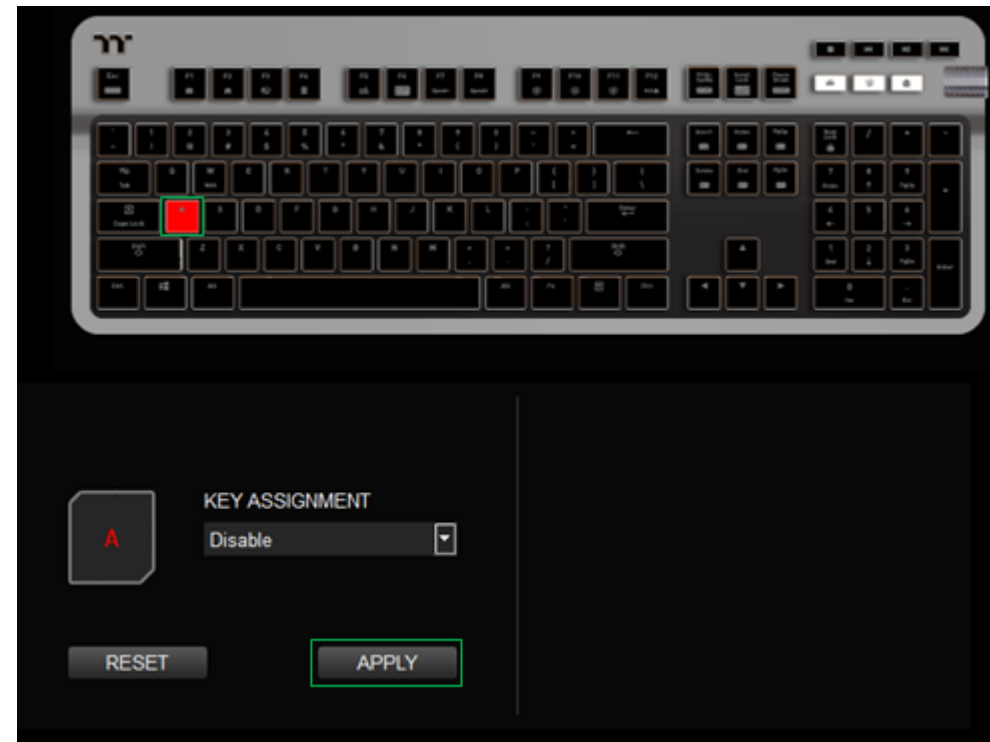

## Step 1:

Select a key, then select "Disable" function from the drop-down list.

## Step 2:

Click Apply to save the new function. Verify if the new key function is applied properly by looking at the color displayed on the screen.

# | Chapter 5: FUNCTIONS AVAILABLE ON THE MACRO PAGE

### New Macro / Delete / Copy / New Text / Import / Export

**New Macro:** Create a new macro.

**Delete:** Delete a macro or text.

**Copy:** Copy a macro or text.

**New Text:** Create a new text.

**Import:** Import a macro or text.

**Export:** Export a macro or text.

### Modifying the Name of a Macro / Text

You can change the name of a new macro or text directly.

### Macro Recording Settings

**Auto-Detect Delay Time:** Record a macro based on the time interval between each keystroke.

**Set Delay Time:** Record a macro based on the specified time interval.

**None Delay:** Record a macro without recording the time interval between each keystroke.

### Macro Recording Area

You can verify the sequence recorded by the macro and the key assignment.

### Record / Delete / Insert / Stop / Edit

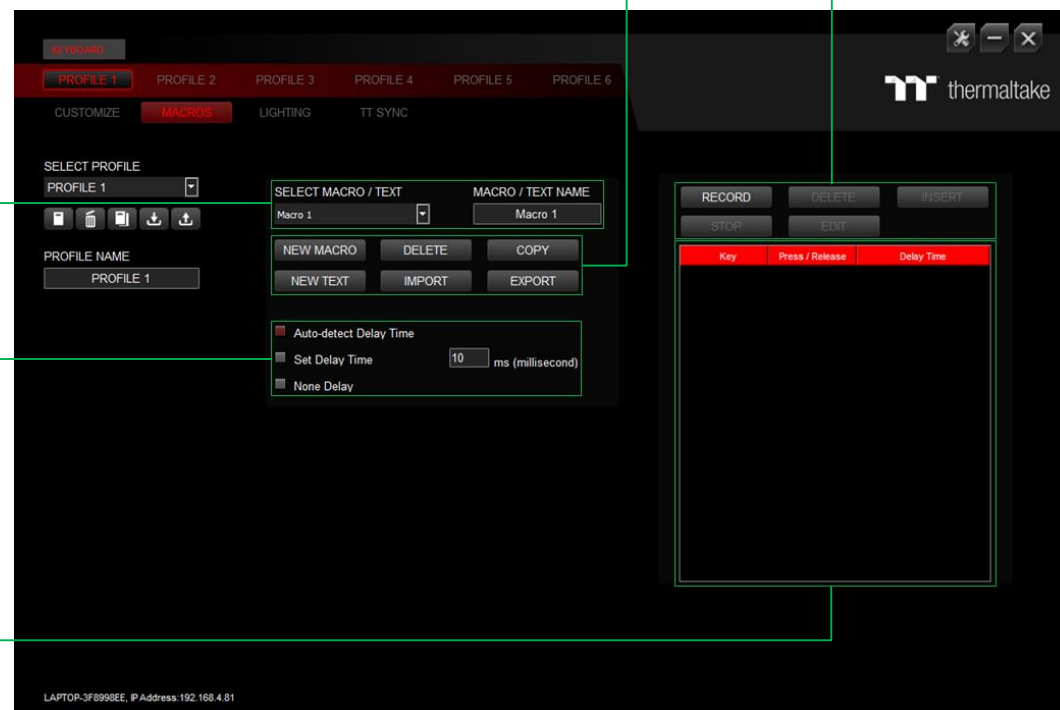

**Record:** Begin macro recording.

**Delete:** Delete the assigned value of a specific key.

**Insert:** Insert an additional value above or below the existing value of a specific key.

**Stop:** End macro recording.

**Edit:** Edit the delay time of a specific key.

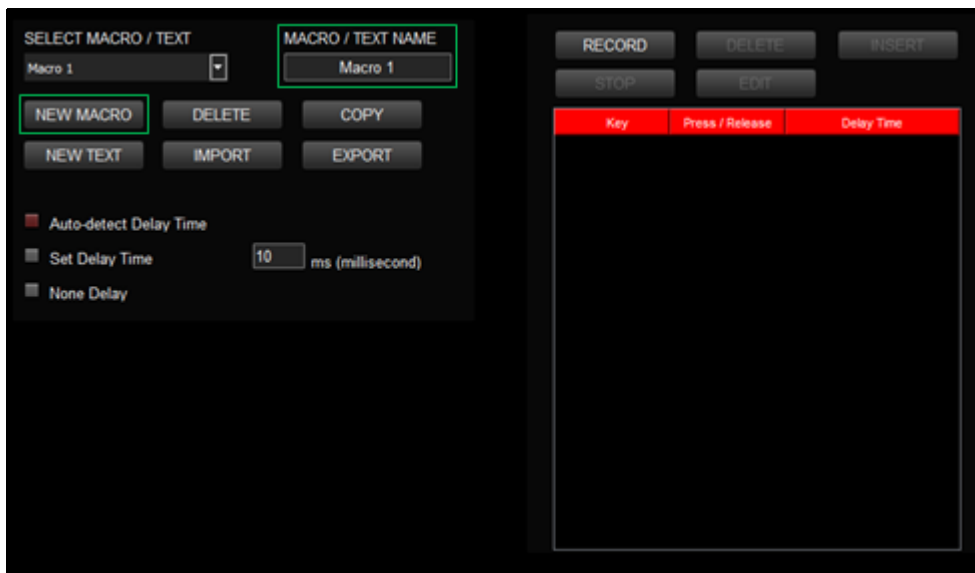

# | Chapter 6: HOW TO RECORD MACROS

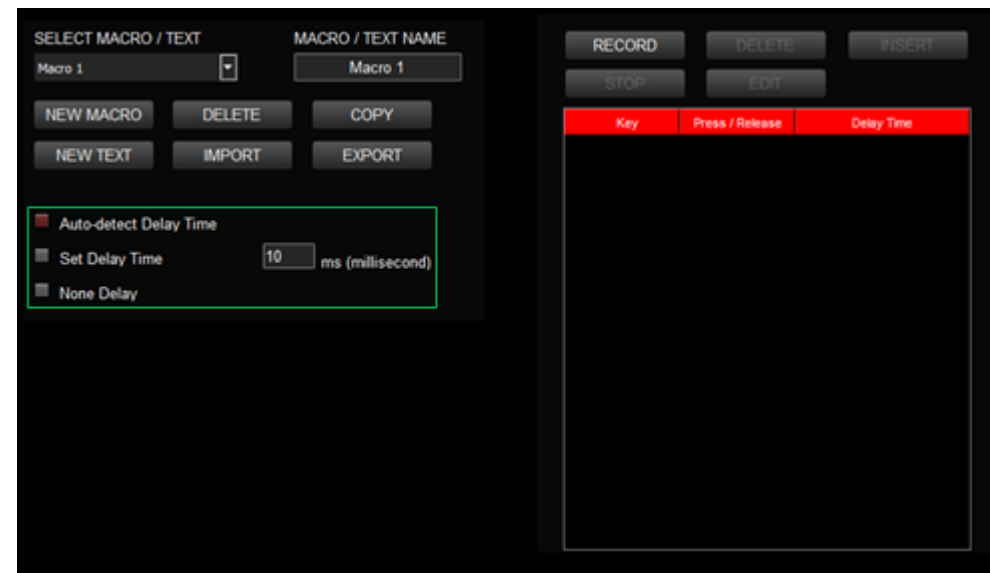

### Step 1:

Add a new macro and modify its name.

### Step 2:

Select the delay method used to record the macro.

### Step 3:

Press the record button.

### Step 4:

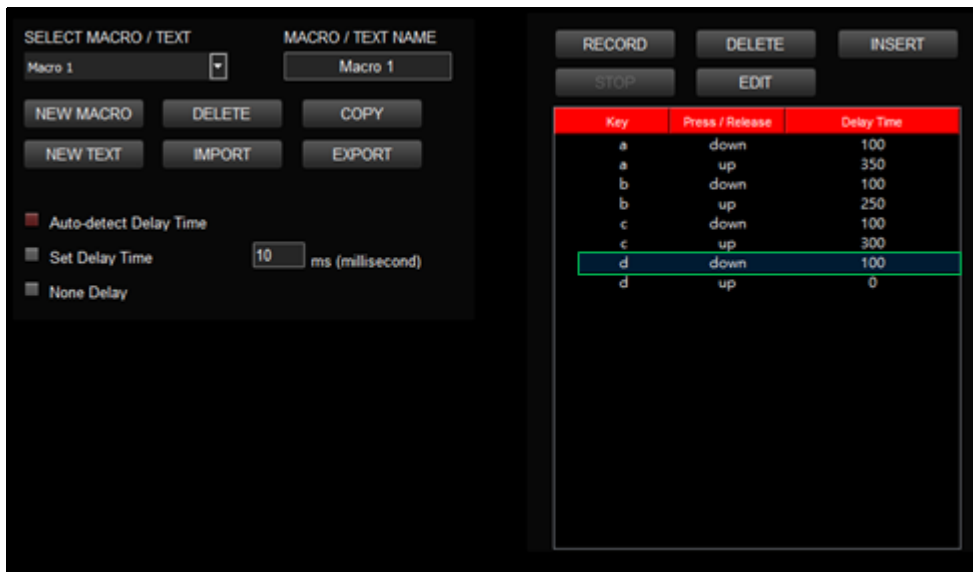

Enter the sequence to be recorded from the keyboard, then press the stop button to complete the recording.

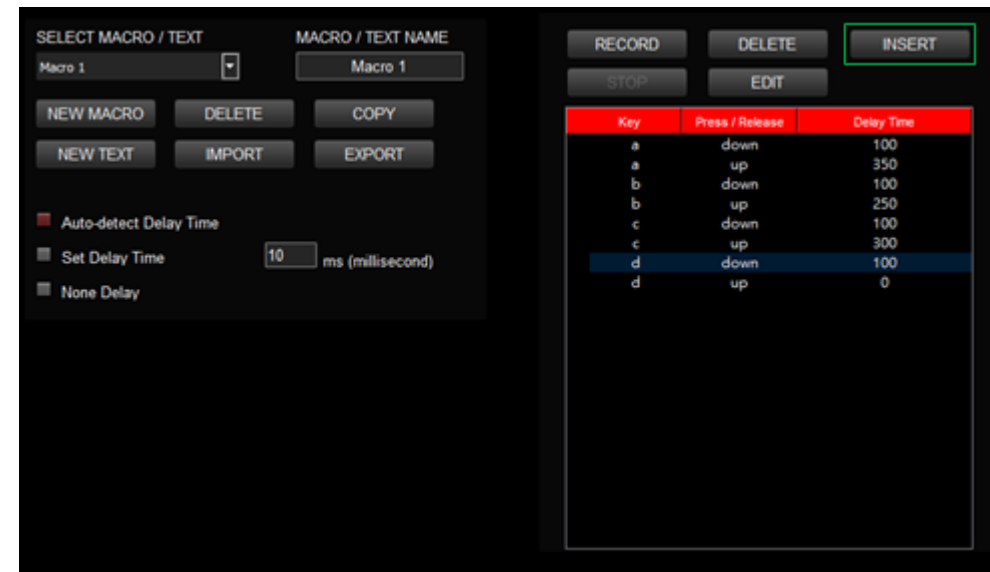

## Step 1:

Select a macro by clicking on the key it is assigned to.

## Step 2:

Click the insert button.

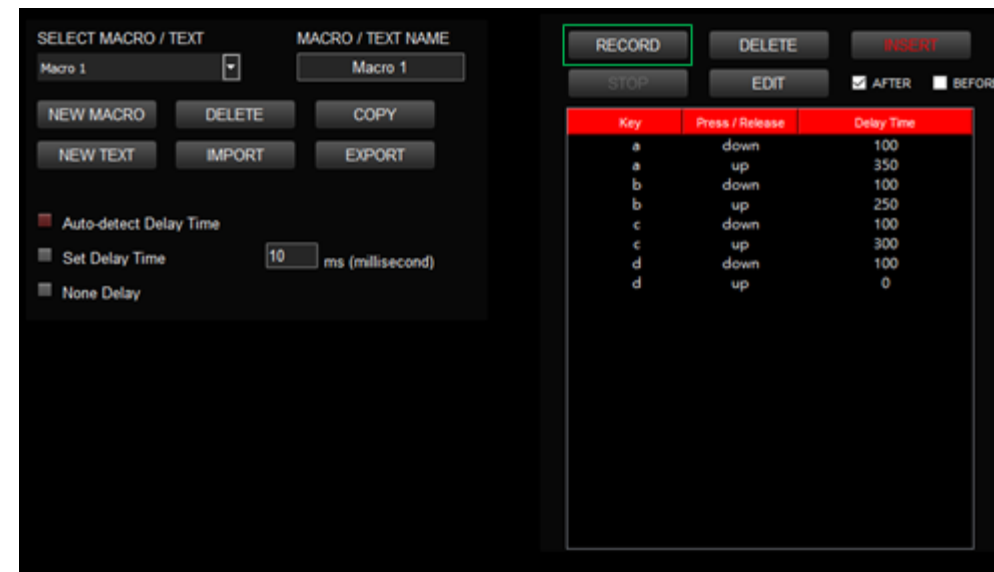

## Step 3:

Select the position where new content is to be inserted.

## Step 4:

Press the record button.

## Step 5:

Enter the sequence to be recorded from the keyboard.

SELECT MACRO / TEXT: Macro 1  
MACRO / TEXT NAME: Macro 1

Buttons: NEW MACRO, DELETE, COPY, NEW TEXT, IMPORT, EXPORT

Auto-detect Delay Time: ☒  
Set Delay Time:  ms (millisecond)  
None Delay: ☐

Buttons: RECORD, DELETE, INSERT, STOP, EDIT, ☒ AFTER, ☐ BEFORE

Key	Press / Release	Delay Time
a	down	100
a	up	350
b	down	100
b	up	250
c	down	100
c	up	300
d	down	100
1	down	100
1	up	250
2	down	100
2	up	250
3	down	100
3	up	200
4	down	150
4	up	0
d	up	0

## Step 6:

Click the stop button to complete the insertion process.

SELECT MACRO / TEXT: Macro 1  
MACRO / TEXT NAME: Macro 1

Buttons: NEW MACRO, DELETE, COPY, NEW TEXT, IMPORT, EXPORT

Auto-detect Delay Time: ☒  
Set Delay Time:  ms (millisecond)  
None Delay: ☐

Buttons: RECORD, DELETE, INSERT, STOP, EDIT, ☒ AFTER, ☐ BEFORE

Key	Press / Release	Delay Time
a	down	100
a	up	350
b	down	100
b	up	250
c	down	100
c	up	300
d	down	100
1	down	100
1	up	250
2	down	100
2	up	250
3	down	100
3	up	200
4	down	150
4	up	0
d	up	0

### Step 1:

Add a new character set and modify its name.

SELECT MACRO / TEXT  
Text 1

MACRO / TEXT NAME  
Text 1

NEW MACRO DELETE COPY  
NEW TEXT IMPORT EXPORT

Auto-detect Delay Time  
☒ Set Delay Time 0 ms (millisecond)  
☐ None Delay

Start Key  SAVE CLEAR  
End Key

### Step 2:

Enter the values for the "Start Key" and "End Key" in the upper right corner.

SELECT MACRO / TEXT  
Text 1

MACRO / TEXT NAME  
Text 1

NEW MACRO DELETE COPY  
NEW TEXT IMPORT EXPORT

Auto-detect Delay Time  
☒ Set Delay Time 0 ms (millisecond)  
☐ None Delay

Start Key Space SAVE CLEAR  
End Key Space

### Step 3:

Click on the input box located at the bottom-right corner and enter the characters to be recorded from the keyboard.

The screenshot shows the 'Text Recording Function' interface. On the left, there are buttons for 'NEW MACRO', 'DELETE', 'COPY', 'NEW TEXT', 'IMPORT', and 'EXPORT'. Below these are checkboxes for 'Auto-detect Delay Time', 'Set Delay Time' (with a value of 0 ms), and 'None Delay'. On the right, there are fields for 'SELECT MACRO / TEXT' (Text 1) and 'MACRO / TEXT NAME' (Text 1). Below these are 'Start Key' and 'End Key' buttons, both set to 'Space', and 'SAVE' and 'CLEAR' buttons. The 'ThermalTake' text is entered in the input box, which is highlighted with a green border.

### Step 4:

Click the save button to complete the recording of the character set.

The screenshot shows the 'Text Recording Function' interface. The 'ThermalTake' text is entered in the input box. The 'SAVE' button is highlighted with a green border, indicating it should be clicked to complete the recording.

# | Chapter 7: FUNCTIONS AVAILABLE ON THE LIGHTING EFFECTS PAGE

### Switching Lighting Effects

**Keyboard light of 15 lighting effects are supported:** Static, Pulse, Wave, Spiral Rainbow, RGB Spectrum, Reactive, Flow, Ripple, Raindrops, Snake, Blink, Brick, Pervade, Music Mode and System Temperature.

### Lighting Effects Configurations

Can be used to adjust the color, direction, speed, and brightness level of the lighting effect; can also be used to switch to random colors.

### Apply / Restore Lighting Effect Settings

**Apply:** Apply the new lighting effect settings to all keys on the keyboard.

**Restore Lighting Effect Settings:** All lighting effect settings saved under the current profile will be restored to factory default values.

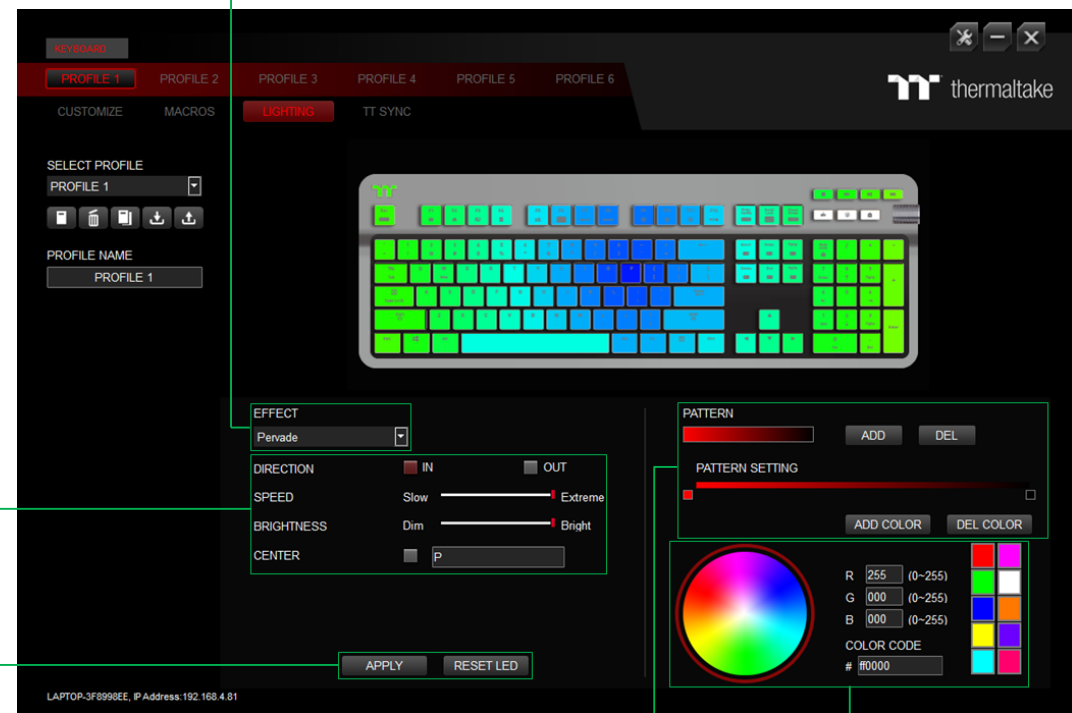

### Color Pattern Settings

**Add Pattern:** Add a new pattern with red to black gradient.

**Delete Pattern:** Delete the currently selected color pattern.

**Insert Color Point:** Add a red color point to the color pattern.

**Delete Color Point:** Delete the selected color point from the color pattern.

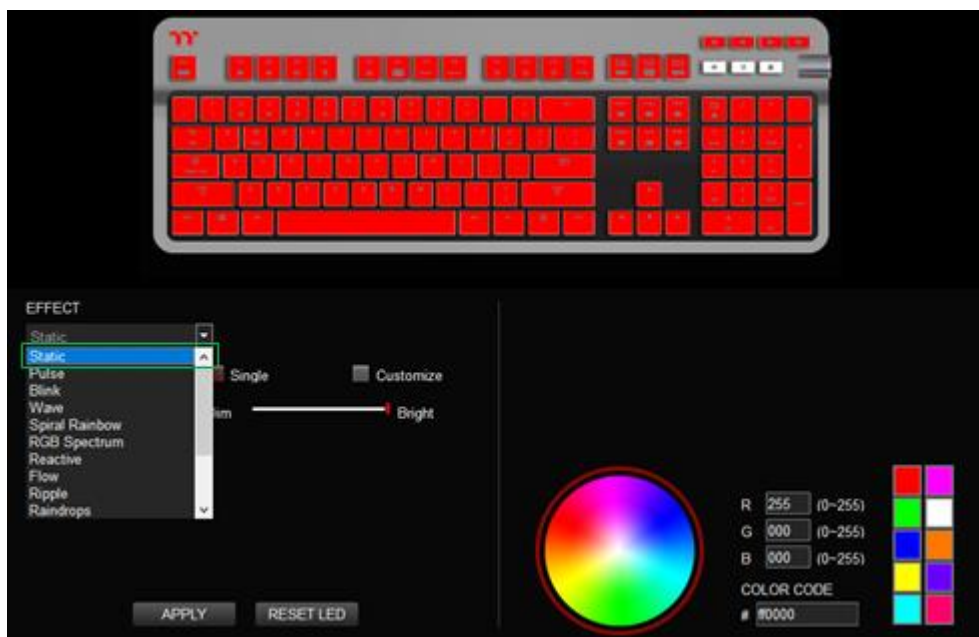

### Color Wheel Settings

You can select a color from the color wheel directly or enter RGB color values to adjust the color of the lighting effect.

# | Chapter 8: LIGHTING EFFECTS OVERVIEW

## Step 1:

Select "Static" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Adjust the brightness level of the backlight.

## Step 4:

Click apply to save the new settings.

## Step 1:

Switch the zones to "Customized".

## Step 2:

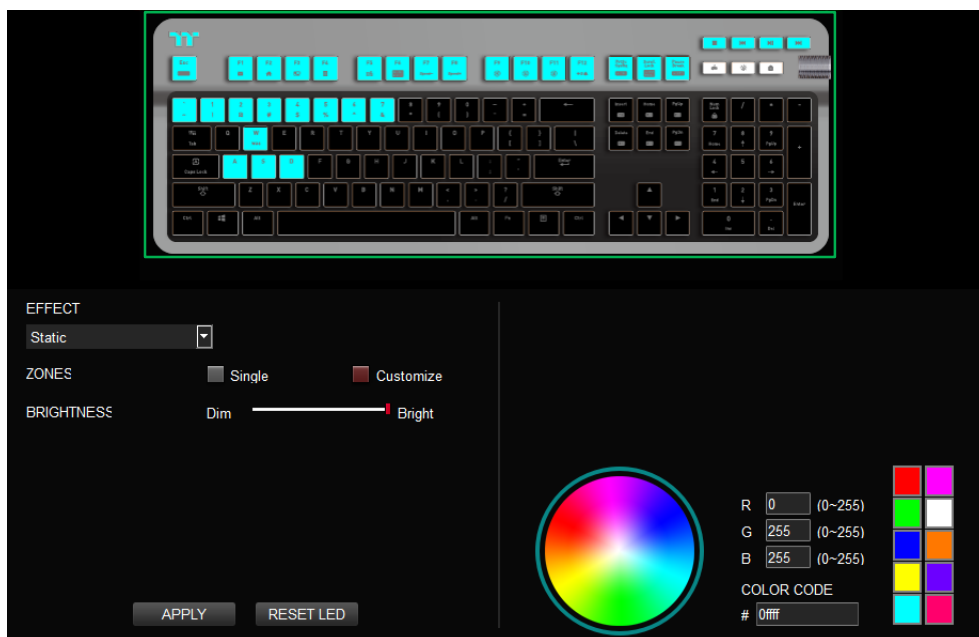

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Click on the keyboard image with the left mouse button to change the key color.

✗ Right click to cancel the color.

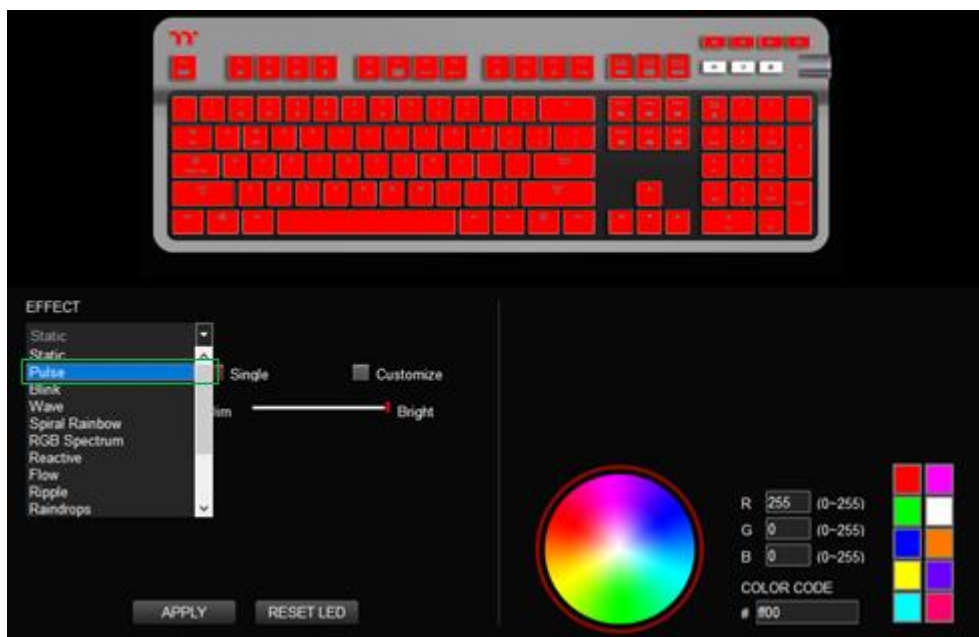

## Step 4:

Click apply to save the new settings.

## Step 1:

Select "Pulse" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Adjust the backlight speed.

## Step 4:

Click apply to save the new settings.

## Step 1:

Switch the zones to "Customized".

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Click on the keyboard image with the left mouse button to change the key color.

✗ Right click to cancel the color.

## Step 4:

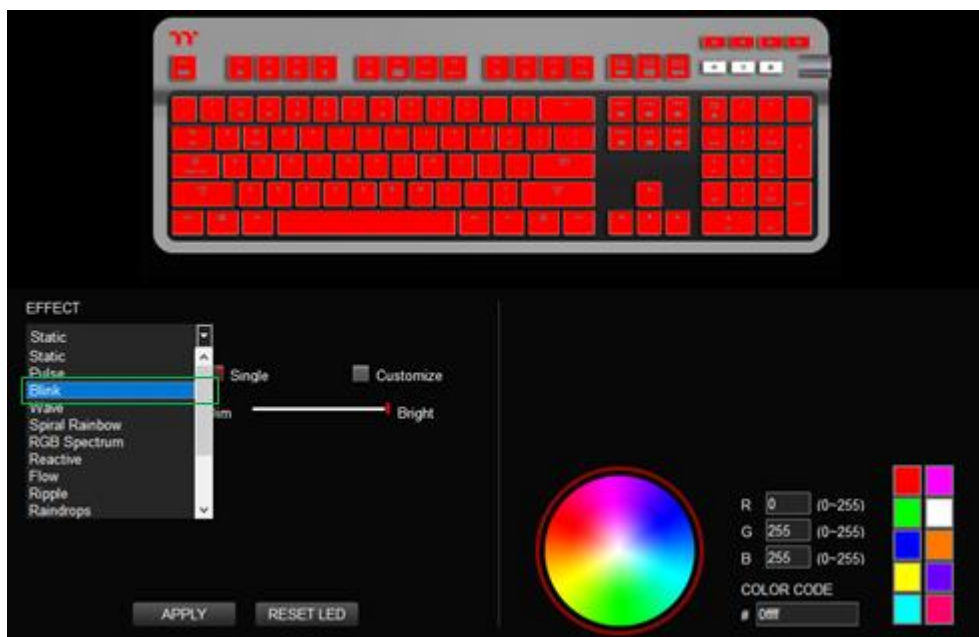

Click apply to save the new settings.

## Step 1:

Select "Blink" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Adjust the backlight speed.

## Step 4:

Click apply to save the new settings.

## Step 1:

Switch the zones to "Customized".

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Click on the keyboard image with the left mouse button to change the key color.

✖ Right click to cancel the color.

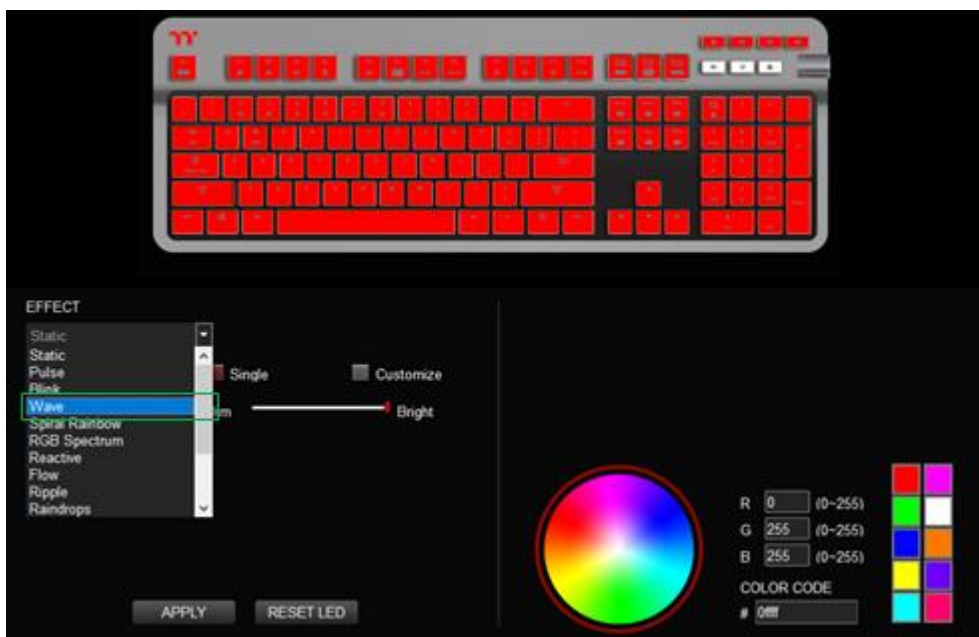

## Step 4:

Click apply to save the new settings.

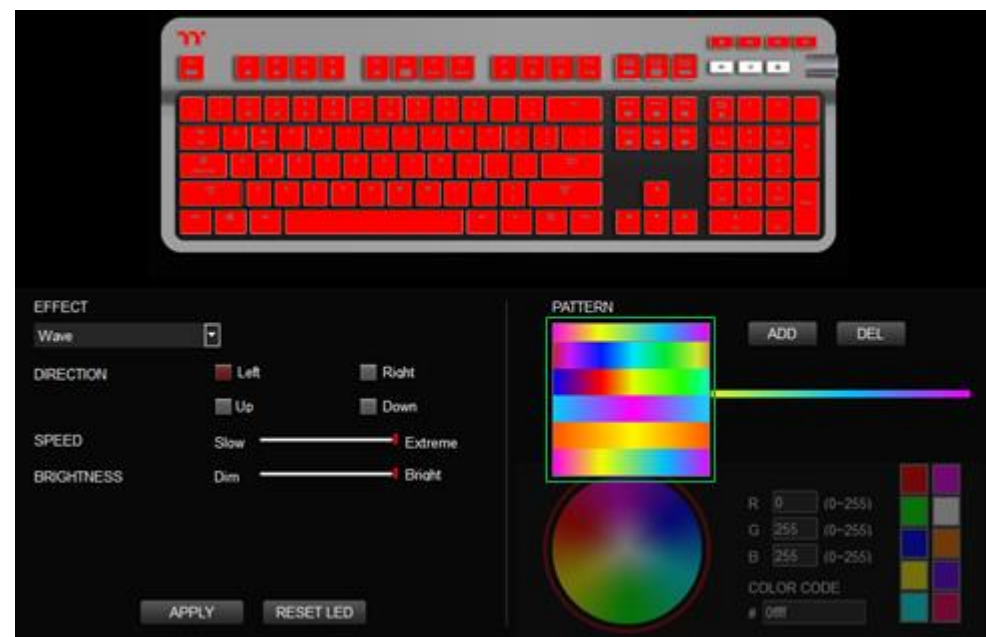

## Step 1:

Select "Wave" in the lighting effect drop-down list.

## Step 2:

Select a set of color patterns on the upper-right.

## Step 3:

Set the direction, speed, and brightness level of the lighting effect.

## Step 4:

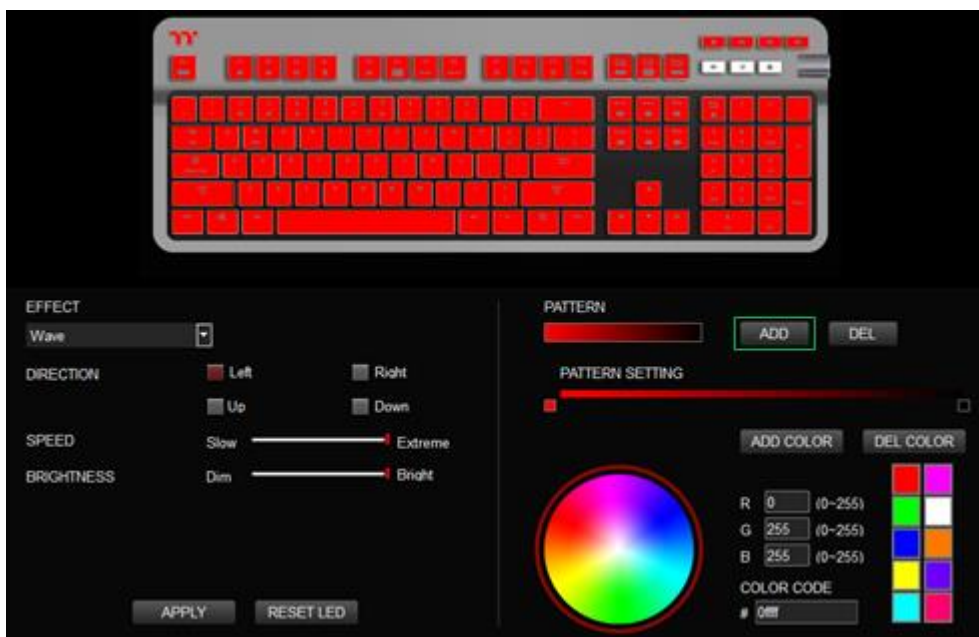

Click apply to save the new settings.

### Step 1:

Add a new set of color patterns.

### Step 2:

Add a new color-insertion point and drag it to the desired position.

### Step 3:

Click on each color-insertion point to modify its color.

### Step 4:

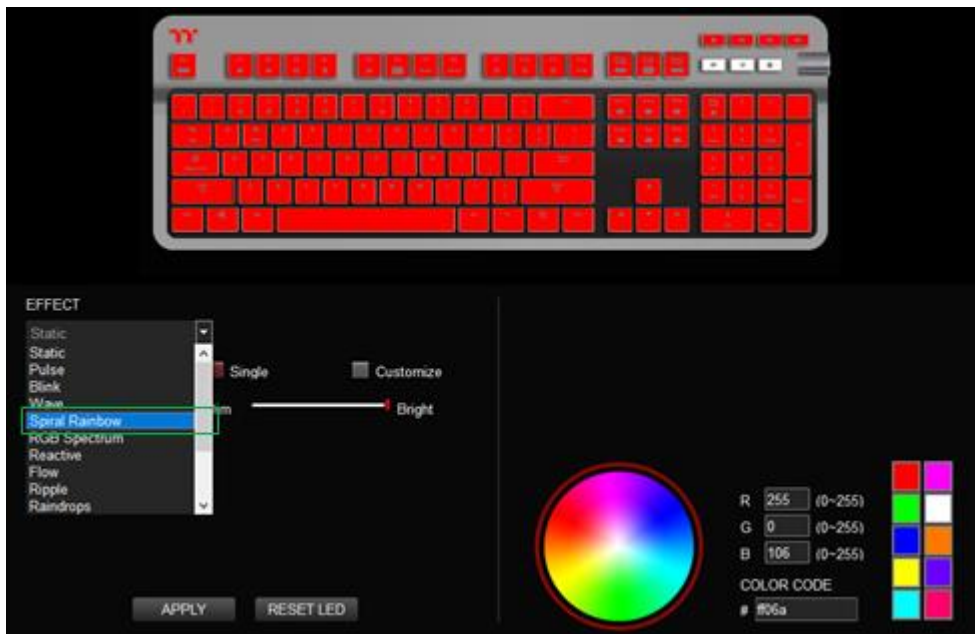

Click apply to save the new settings.

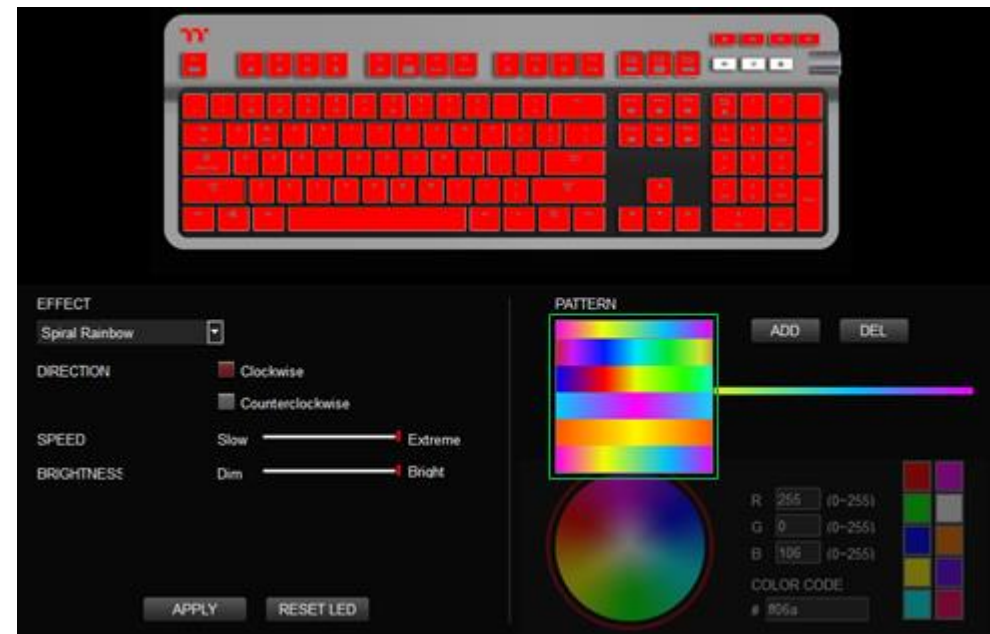

### Step 1:

Select "Spiral Rainbow" in the lighting effect drop-down list.

### Step 2:

Select a set of color patterns on the upper-right.

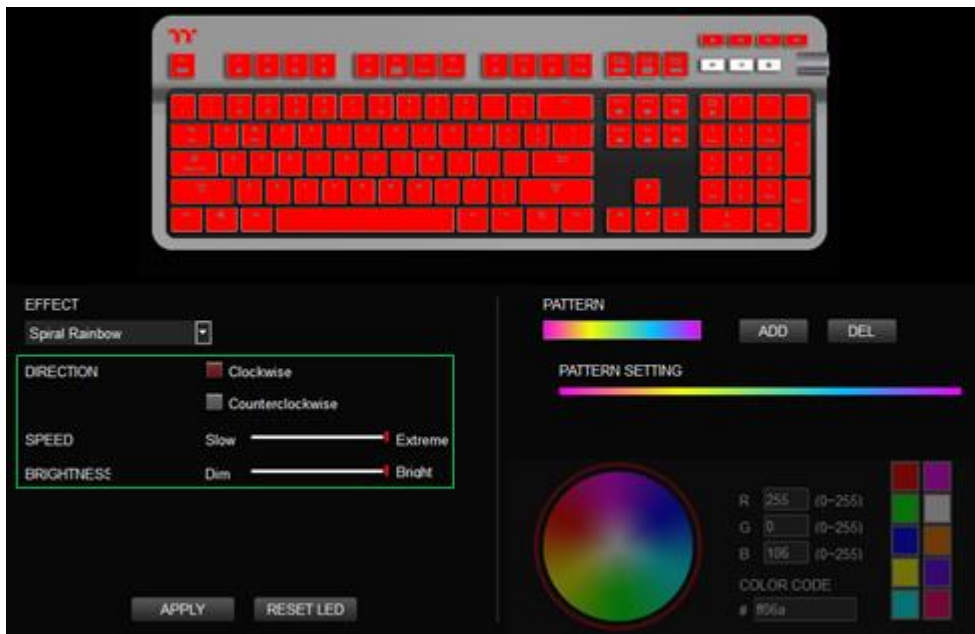

## Step 3:

Set the direction, speed, and brightness level of the lighting effect.

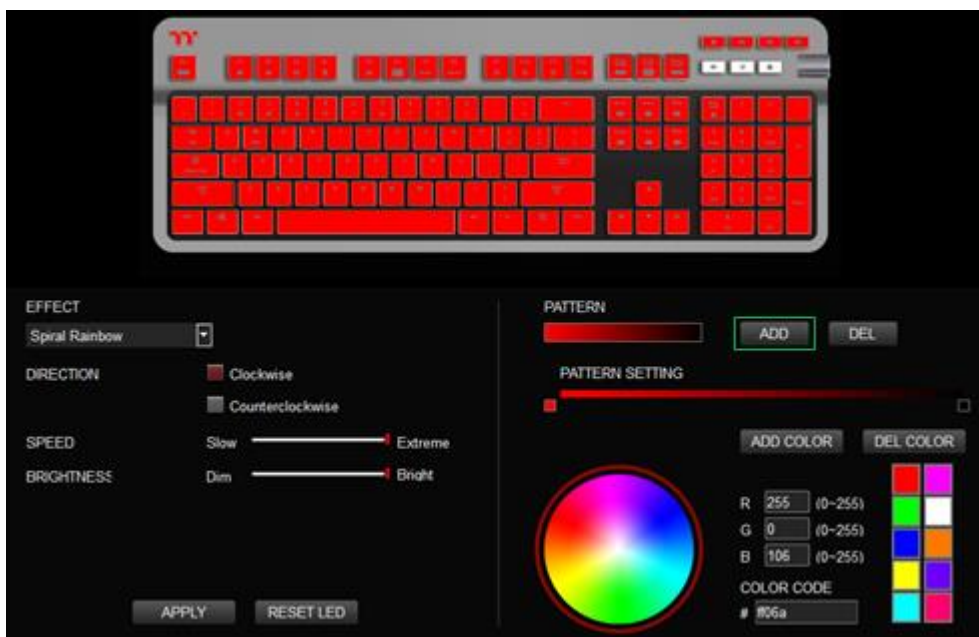

## Step 4:

Click apply to save the new settings.

## Step 1:

Add a new set of color patterns.

## Step 2:

Add a new color-insertion point and drag it to the desired position.

## Step 3:

Click on each color-insertion point to modify its color.

## Step 4:

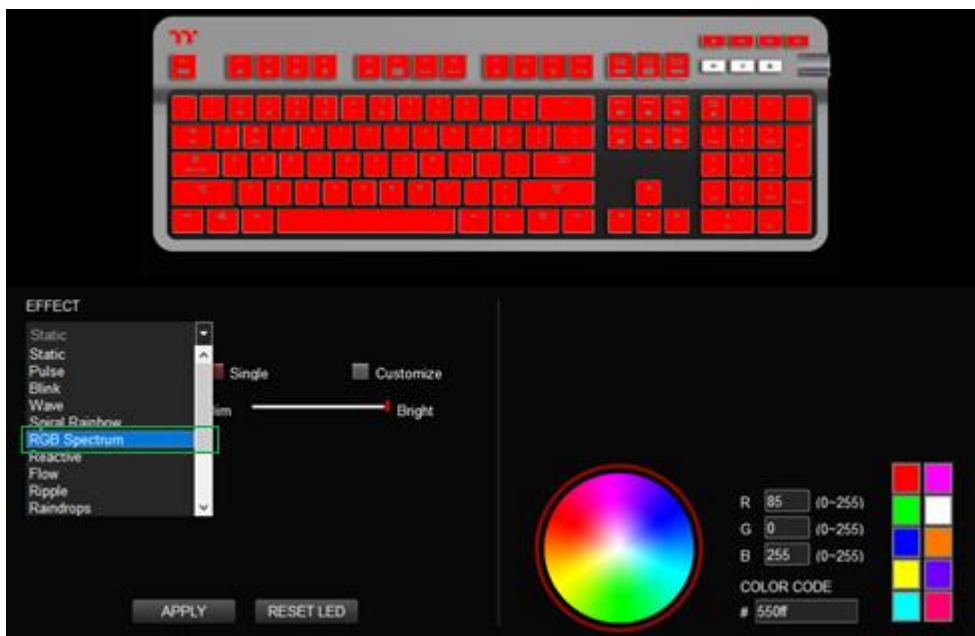

Click apply to save the new settings.

## Step 1:

Select "RGB Spectrum" in the lighting effect drop-down list.

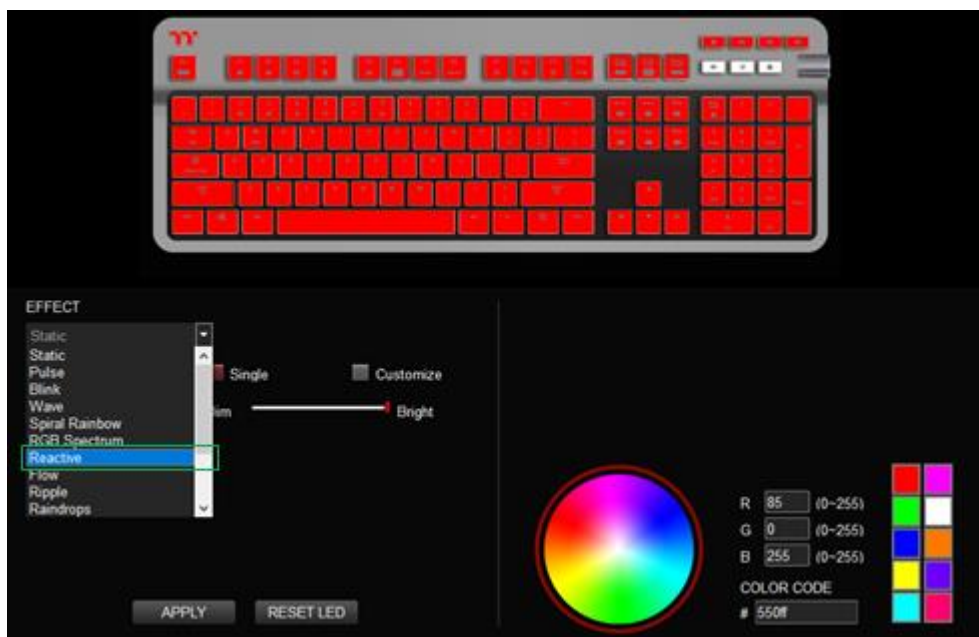

## Step 2:

Set the speed and brightness level of the backlight and click on Apply to save the new settings.

## Step 1:

Select "Reactive" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Adjust the backlight speed.

## Step 4:

Click apply to save the new settings.

## Step 1:

Switch the zones to "Customized".

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Click on the keyboard image with the left mouse button to change the key color.

✗ Right click to cancel the color.

## Step 4:

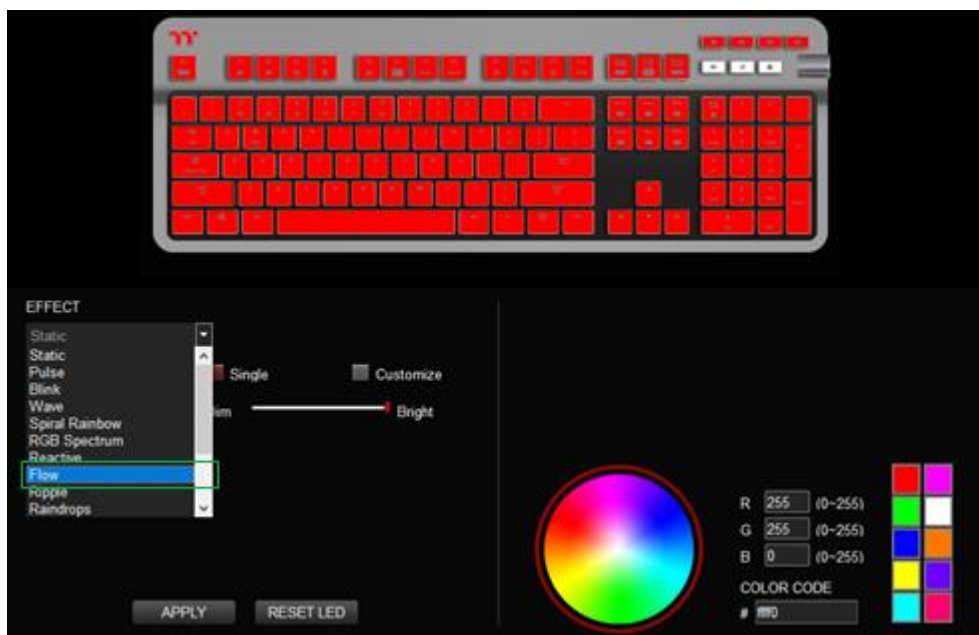

Click apply to save the new settings.

## Step 1:

Select "Flow" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Set the speed and brightness level of the backlight.

## Step 4:

Click apply to save the new settings.

## Step 1:

Set the zone to "Customized", then add a new set of color patterns.

## Step 2:

Add a new color-insertion point and drag it to the desired position.

## Step 3:

Click on each color-insertion point to modify its color.

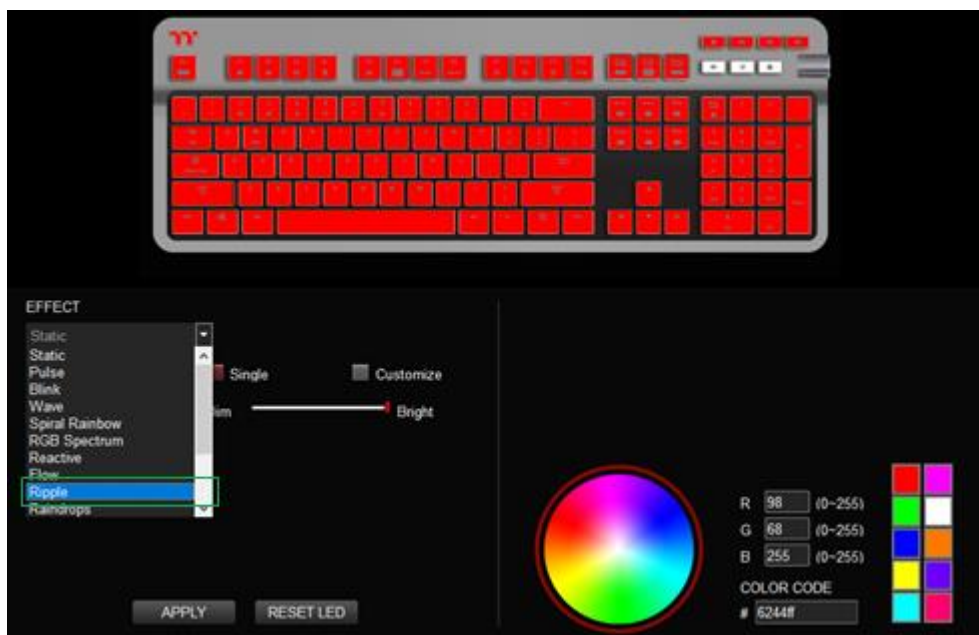

## Step 4:

Click apply to save the new settings.

## Step 1:

Select "Ripple" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Set the speed and brightness level of the backlight.

## Step 4:

Click apply to save the new settings.

## Step 1:

Set the zone to "Customized", then add a new set of color patterns.

## Step 2:

Add a new color-insertion point and drag it to the desired position.

## Step 3:

Click on each color-insertion point to modify its color.

## Step 4:

Click apply to save the new settings.

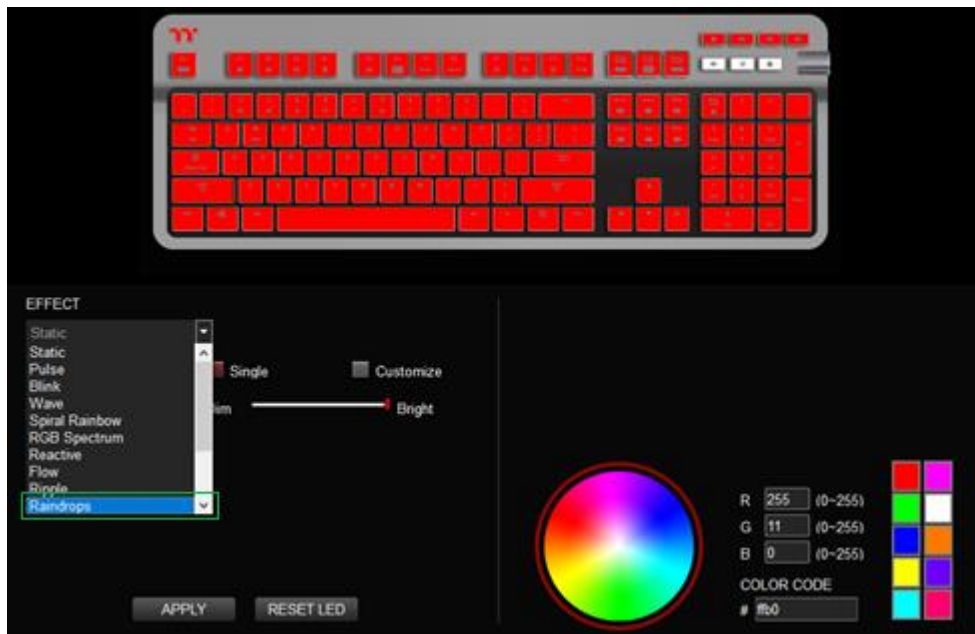

## Step 1:

Select "Raindrops" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Set the speed and brightness level of the backlight.

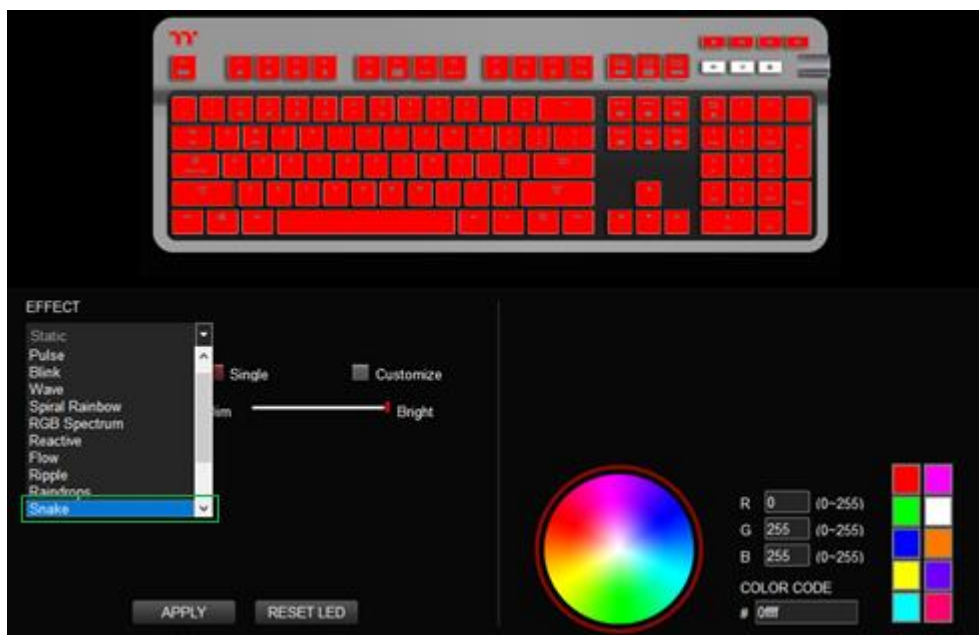

## Step 4:

Click apply to save the new settings.

## Step 1:

Select "Snake" in the lighting effect drop-down list.

## Step 2:

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Set the direction, speed, and brightness level of the lighting effect.

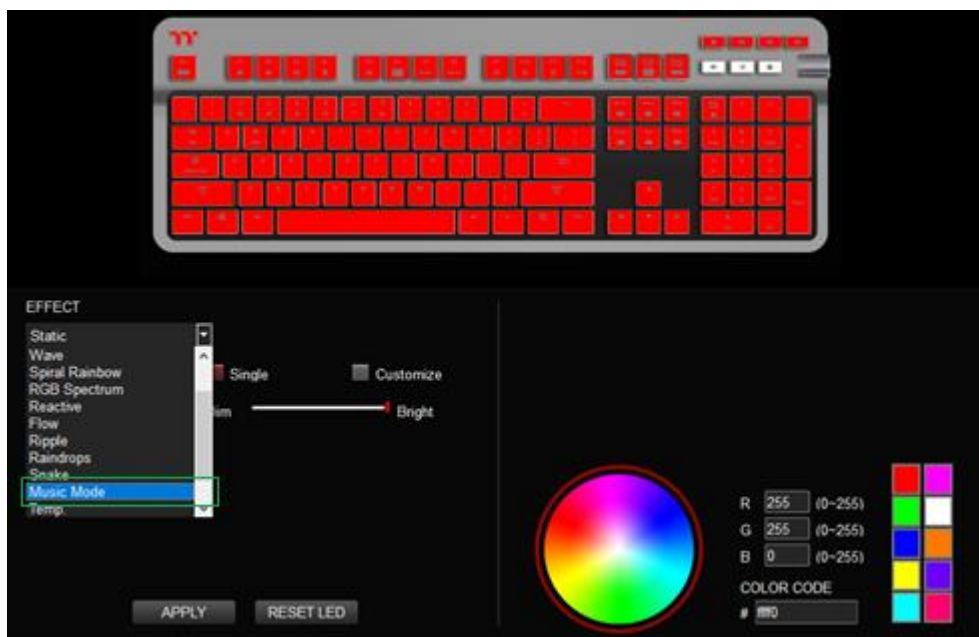

## Step 4:

Click apply to save the new settings.

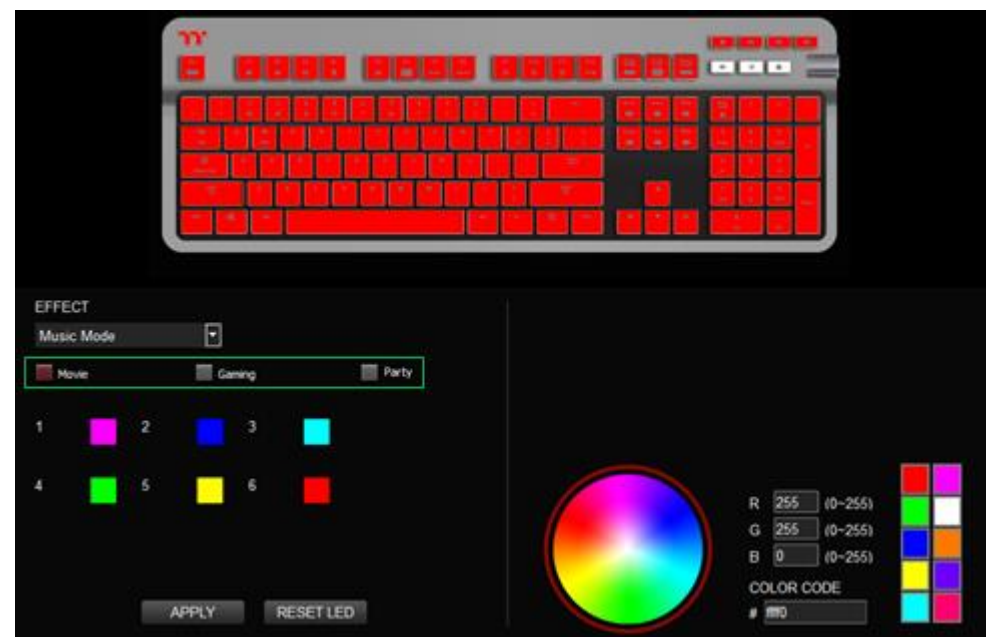

## Step 1:

Select "Music Mode" in the lighting effect drop-down list.

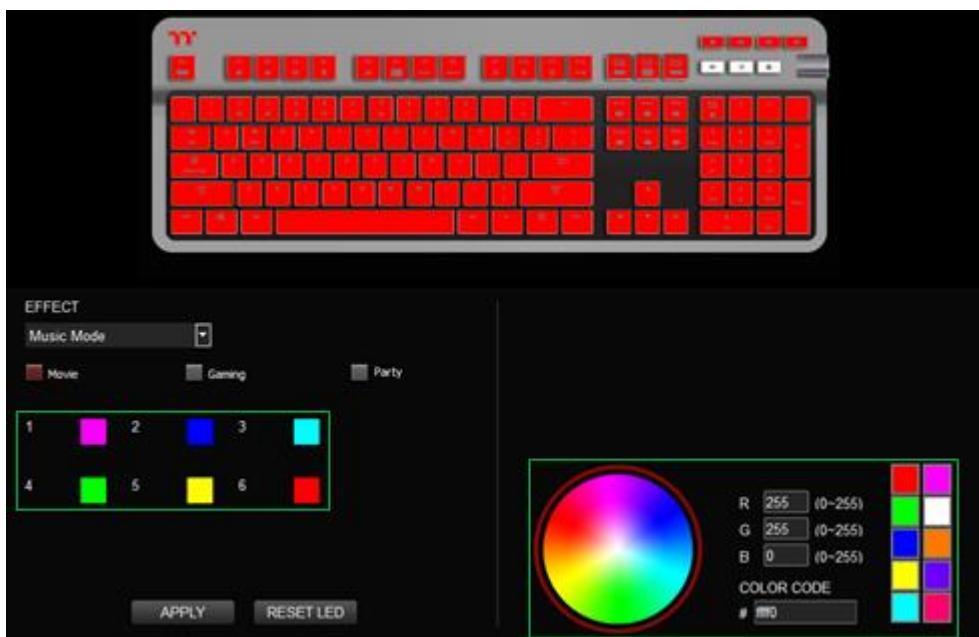

## Step 2:

Set the desired mode of lighting effects.

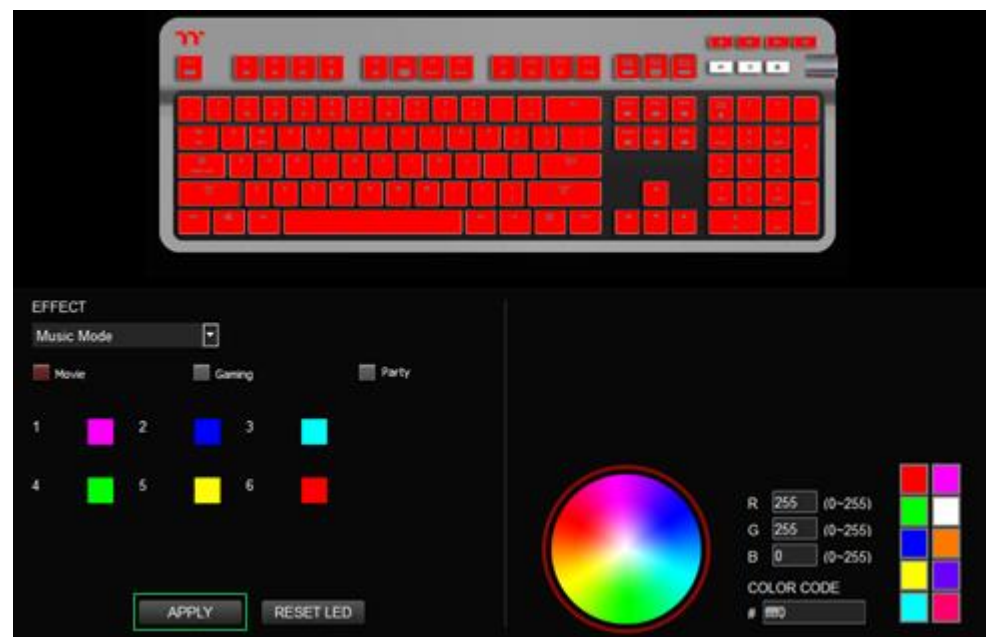

## Step 3:

Click on a color inside the color wheel or enter the RGB color values to change the color of each row.

## Step 4:

Click apply to save the new settings.

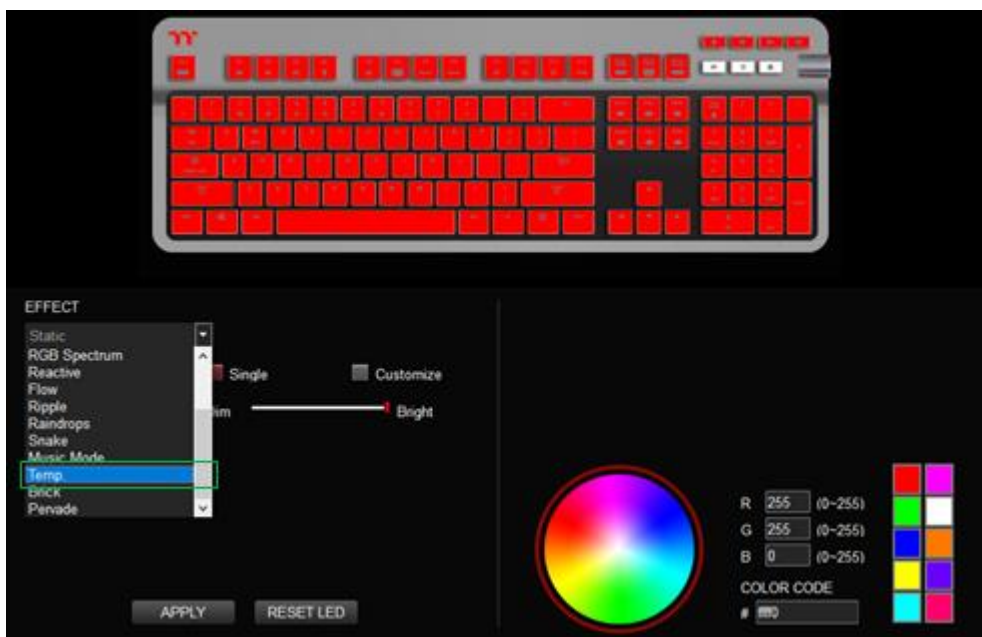

## Step 1:

Select "System Temperature" in the lighting effect drop-down list.

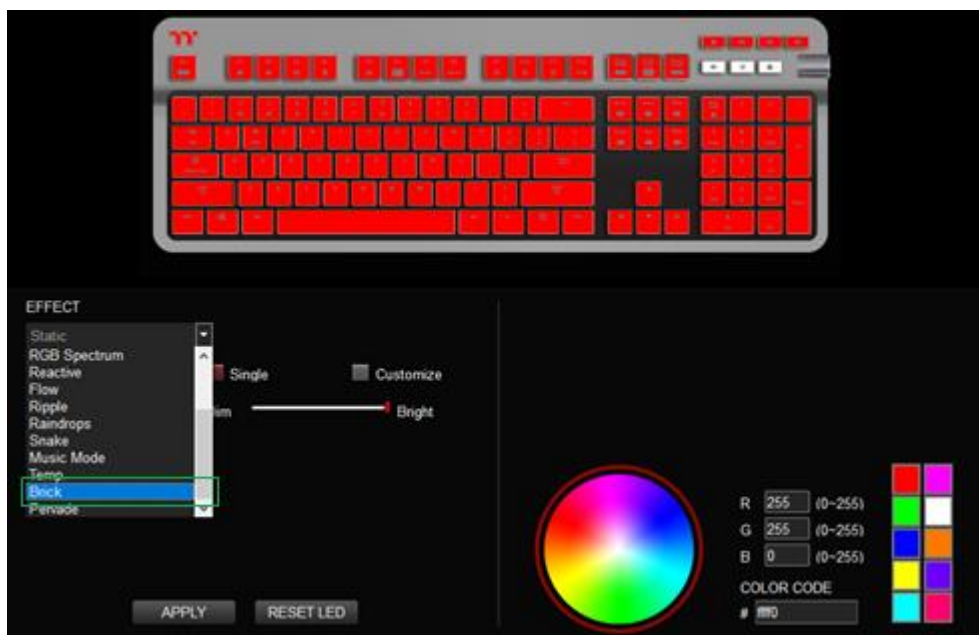

## Step 2:

Click apply to save the new settings.

## Step 1:

Select "Brick" in the lighting effect drop-down list.

## Step 2:

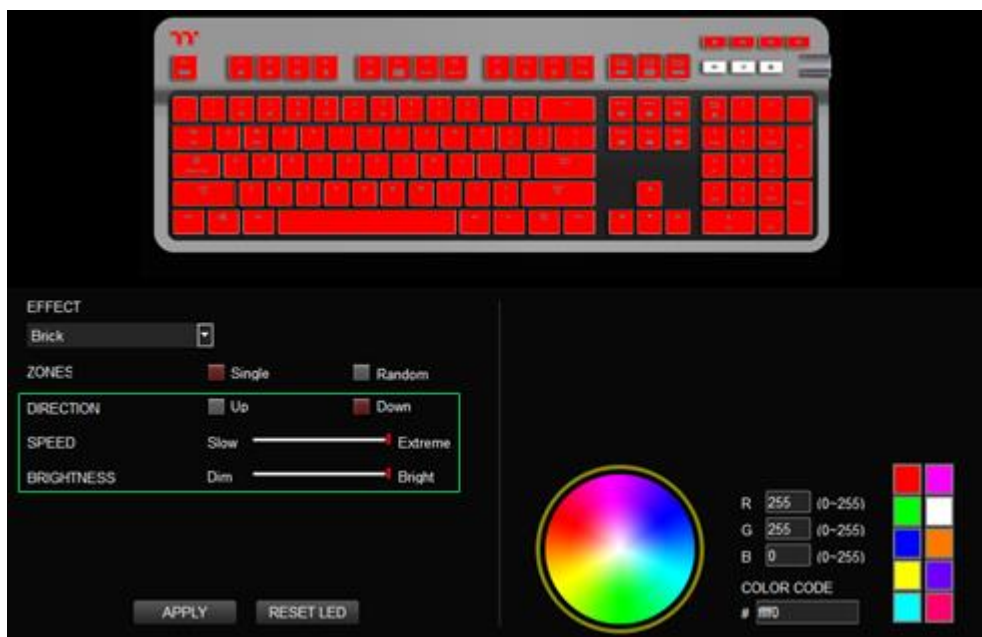

Click on a color inside the color wheel or enter the RGB color values to change the color.

## Step 3:

Set the direction, speed, and brightness level of the lighting effect.

## Step 4:

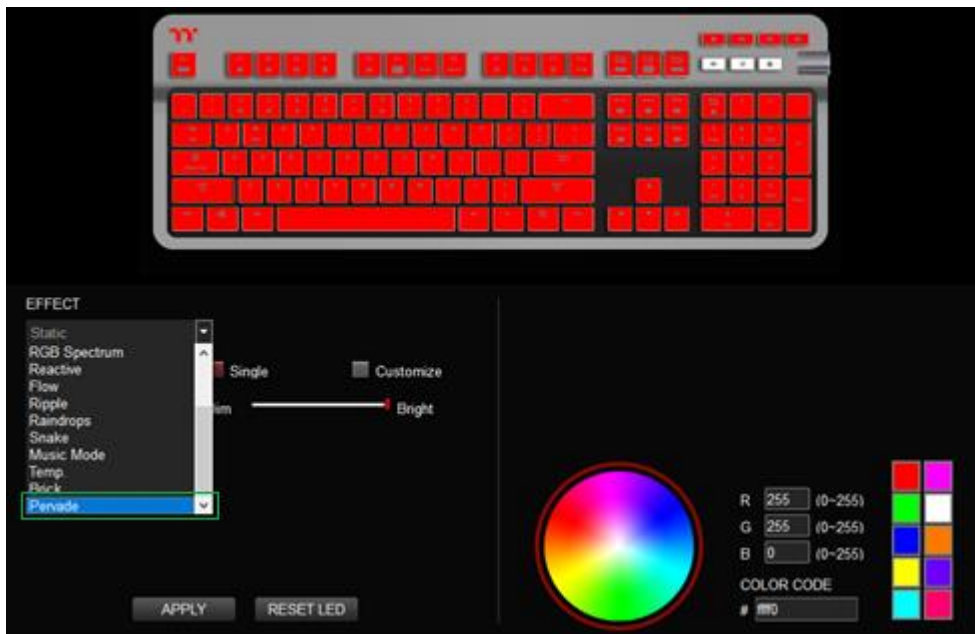

Click apply to save the new settings.

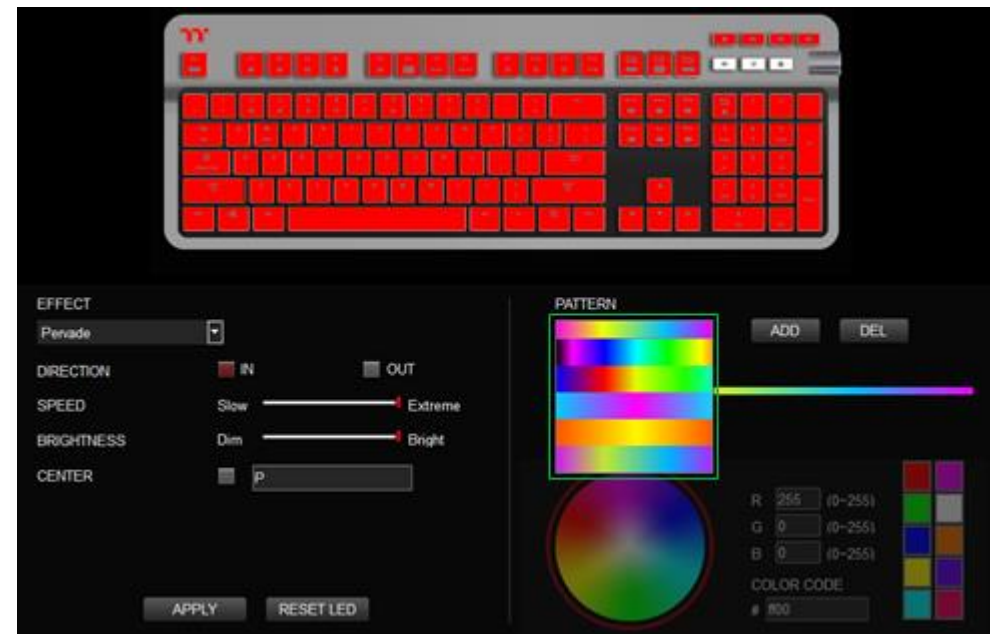

## Step 1:

Select "Pervade" in the lighting effect drop-down list.

## Step 2:

Select a set of color patterns on the upper-right.

## Step 3:

Set the direction, speed, brightness level and center of the lighting effect.

## Step 4:

Click apply to save the new settings.

### Step 1:

Add a new set of color patterns.

### Step 2:

Add a new color-insertion point and drag it to the desired position.

### Step 3:

Click on each color-insertion point to modify its color.

### Step 4:

Click apply to save the new settings.

# | Chapter 9: FUNCTIONS AVAILABLE ON THE SETTINGS PAGE

## Language Settings

Sets the language of the program's user Interface and theme.

## Razer Chroma On / OFF

Users who have installed both the TT iTAKE Software and Razer Synapse 3 can experience synchronized gaming and RGB lighting effects on their gaming gear.

## Amazon Alexa Login

TT iTAKE software support Amazon Alexa voice service, allowing you to control the lights by talking to the Alexa Enabled device.

## TT iTAKE APP Password Setting

Enter four number or English alphabet.

✕ Empty is disable function.

## Official Website / Social Media

**Official Website:** Visit the Product official website.

**Social Media:** Visit Thermaltake on Facebook.

## Software Version

**Software Version:** Displays the version number of the installed program.
