

This product is intended for installation only by expert users. Please consult with a qualified technician for installation. Improper installation may result in damage to your equipment. Before you start using this product please follow these basic guidelines:

1. Please carefully read through the instruction manual before beginning the installation process.
2. Please remove your graphics card from your motherboard to insure the safest process and in order to prevent any possible damages to your CPU and motherboard.
3. It is strongly recommended to use market proven pre-mix coolant, such as Thermaltake Coolant 1000.

Parts List

Disassemble the thermal module (cooler) of the graphics card and clean the thermal paste from the GPU

Install brackets to secure the I/O metal components.

Cut the thermal pads to the dimensions listed and place them on the spots shown on the diagram.

Apply thermal compound

When installing the water block, carefully position the water block with the preinstalled standoffs on the graphics card.

Caution: Please remove the backplate if the ITX MB interferes with the product during the installation process

Finish
