

Congratulations on your new PC! Removing the panels to access the interior of the View 380 case is easy! Follow along this guide to learn how:

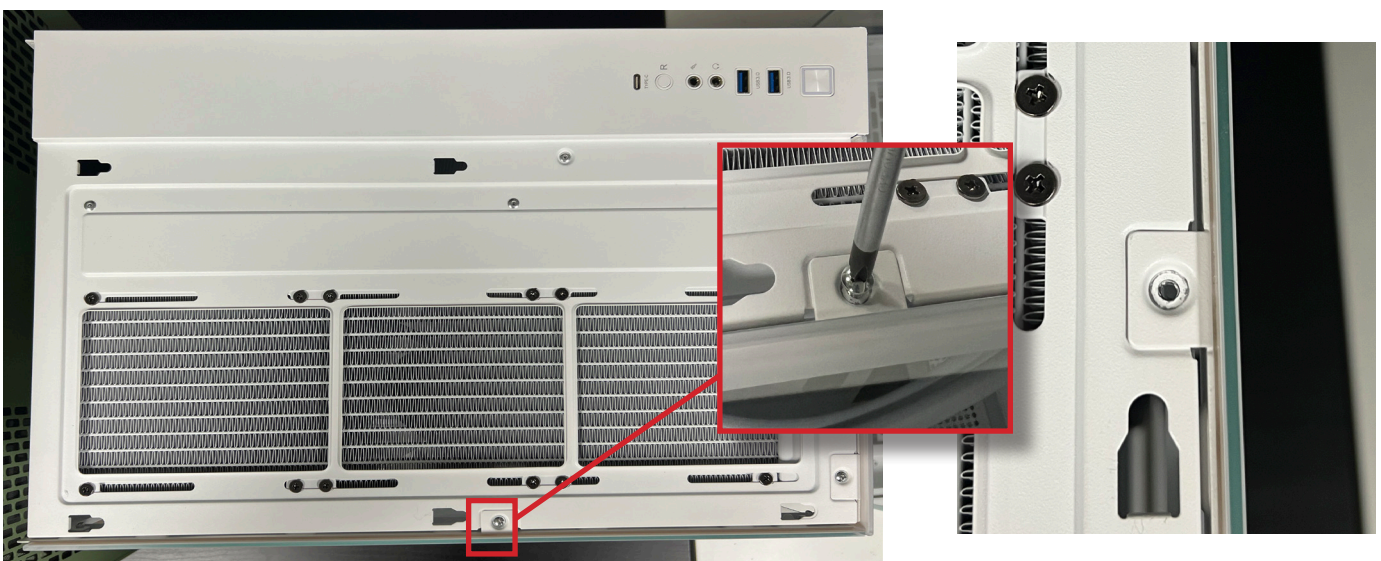

STEP 1

Locate the 2 top panel mounting thumb screws on the back side of the case and loosen to slide the top panel off.

STEP 2

Locate and unscrew the single side panel mounting screw on the top of the case.

STEP 3

Locate the tab on the top left side of the side glass panel. Gently pull on it to unlatch the side panel from the top and then lift the panel upward to remove from the case frame.

STEP 4

The front glass panel can then be removed by unscrewing the 2 front mounting screws on the top of the case, then pulling gently on the panel to unlatch the top end and lifting it up and out of the case frame to open up the case further.

View 380 Case with all glass panels removed.
